Fears over devaluation send Russian markets plunging

Russian markets plunged yesterday as investors feared the verament might soon be forced into a devaluation or a domestic debt restructuring, while the central bank moved to shore up the stability of the banking sector.

Trading was suspended on the Russian stock market early yes-

terday morning as shares fell by 15 per cent. But equity prices later recovered some ground and the RTS-IF index of leading stocks closed 6.5 per cent lower. Yields on short-term treasury bills also soared to more than 210 per cent at one point. They closed at 170 per cent, their highest level since before the 1996 presidential elections, when invastors were afraid the Communist party would return to passer. Ru dollar-denominated debt was also trading at levels which implied

US cigar profits dampened by flood of imports

By Richard Tomkins in New York

The beginning of the end of the cigar (ad, or maybe just a glut. Whatever the reason, US cigar companies' profits are going up

Yesterday General Cigar, maker of Macanudos, the top selling premium brand, warned it expected to report earnings per share of just 15-20 cents in the third quarter, much less than the 39 cents reported a year earlier or the 27 cents expected by analysis. The warning come just a few days after Consolidated Cigar. the biggest US cigar company, reported a fall in net profits from \$13m to \$10m in the second quarter, and said the trend would con-tinue for the rest of the year.

Both companies have fallen victim to a sudden about turn in the industry's fortunes following the craze for smoking big, fat, expensive cigars which started in

For the best part of three years, US cigar companies found them selves unable to keep up with demand and prices went up. But last year overseas manufacturers started flooding the US market with previously unknown brands. These cigars, contemptuously described as Don Nobodies by

connoisseurs, were lower in quality than established brands. But they were also cheaper and found a ready market among inexperienced smokers.

Norman Sharp, president of the Cigar Association of America, an industry body, said the influx of cigars had produced a surplus of about 100m premium cigars at various stages of the supply chain. These were now being sold at low prices, hurting established companies and newcomers alike. Mr Sharp said the influx of Don

ciear companies hope profits will bounce back once the glut bas worked itself out. But a worry is that a further fall in stock prices. bringing a decline in the feelgood effect, will dampen demand. "The faddish part of it, I think,

has worn off," Mr Sharp cautioned. "But I think there are still a lot of people out there who are interested in the product, people who consider a fine cigar a fine experience and enjoy relaxing

Holocaust payouts lift sanctions threat

By Joho Authers in New York and William Hall in Zurich

The controllers of New York's city and state pension funds yesterday lifted their threat of sanctions against Swiss banks and other Swiss companies, in reaction to Wednesday's announcement by UBS and Credit Suisse

The suspension of the sanctions threat was the clearest sign that the deal, arranged after two days of negotiations with a ment, but Mr Gut said he bad Brooklyn judge, would release Swiss banks from the international campaign over their wartime actions. The US and the Israeli governments vesterday ment, while the Swiss government issued a cautious welcome. Alan Hevesi, New York city comptroller, had been prepared to start imposing sanctions, which would have included total divestment of shares in all Swiss

companies next month. However, the pressure on European insurers and on German banks, which face legal action holocaust victims' OVET anclaimed insurance policies,

intensified yesterday, with US lawyers saying they were now armed with a precedent. Rainer Gut, the chairman of Credit Suisse, said the two banks had been keen to include the Swiss insurance companies in the

settlement but it was not possible

because they were part of a separate class action which includes that they were prepared to pay other European insurers. \$1.25bn to Holocaust survivors. LONG-TERM UNEMPLOYMENT

Bonn governing parties in wage supplement plan

Germany's governing Christian Democratic Union and Christian Social Union (CDU/CSU) yesterday unveiled plans to supplement low wages with state benefits in a "combi-wage" system. The step is part of an effort to bring the country's 1.35m long-term unemployed back to

Norbert Blüm, the labour minister, suggested combiwages could create as many as 100,000-150,000 jobs, particularly in areas where wages were lower than social security and unemployment benefits.

Mr Blum cited catering, domestic services, farming and

retail as likely fields for putting combi-wages into practice. on September 27 - according to recent polls still an uncertain prospect - combi-wages would be introduced as soon as possible, Mr Blüm said. Tobias Buck, Bonn

KOSOVO CONFLICT

Albanians unable to unite

US efforts to unite the leaders of the Albanian majority in Serbla's Kosovo province into a single negotiating team appeared to have ended in failure yesterday. A new fivemember team announced by Ibrahim Rugova, leader of the main Democratic League of Kosovo, did not include any political opponents or the rebel Kosovo Liberation Army

The shadowy KLA issued a statement saying that only Adem Demaci, who spent 27 years as a political prisoner in Serbia and is a flerce rival of Mr Rugova, could play a leading role in setting up new institutions in Kosovo. It was the first time that the KLA, believed to be controlled by nationalist exiles in Europe, had publicly named what

amounts to its political wing.

Analysts said the deepening divisions among the ethnic Albanian groups would further complicate the search for a political solution. Guy Dimmore, Belgrade

SPANISH ECONOMY

Inflation above target level

Rising prices in Spain's crowded tourist resorts have pushed inflation up above the government's target level, with a rate of 2.2 per cent in the 12 months to July, the highest since March last year.

The centre-right government said the figures from the National Statistics Institute, which showed consumer prices up 0.4 per cent during the month, were "somewhat higher than expected but there was no cause for alarm, and it could still achieve its 2.1 per cent target for the year

Cristóbal Montoro, state secretary for the economy. hoped talks with tourist industry representatives would curb the price trend in the sector, which has taken advantage of strong demand to raise charges. A 1.6 per cent upsurge in tourism prices was one of the main factors in last month's overall rise, along with higher food costs. Underlying inflation, omitting fresh food and energy prices, moved up to a 12-month rate of 2.5 per cent against 2.4 per cent a month earlier. David White, Madrid

SWEDISH POLITICS

Emu claims rejected

The dispute between Sweden's ruling Social Democrats and the opposition Moderate party over European economic and monetary union (Emu) intensified yesterday when Erlk Asbrink, the finance minister, rejected opposition claims that the government was hampering business preparations for the single currency.

Sweden will not be adopting the euro next year but Mr Asbrink said the government was actively informing companies on how to use it for invoicing and payments, Carl Bildt, Moderate party leader, claimed this week delays caused by Social Democrat splits over the single currency meant new regulations for switching accounting were delayed. Retail sales decline by 0.4% in July

GM LABOUR DISPUTE DRAGS DOWN FIGURES

US retail sales fell by 0.4 per cent in July from a month have climbed back by 3 per earlier, due mostly to the General Motors strike that building materials sector dragged down new car sales by 3 per cent in the month

The report on retail sales, Commerce Department. showed less of a fall in the vehicle sector than expected rebound in the next two months, according to analysts. HSBC Securities, the international banking and financial services organisation, said the drop was much less dramatic than the 20 per cent or more drop reported by car manufacturers.

"The retail sales report is compiled from sales returns from auto dealers, not manufacturers, and their numbers tend to be much less volatile from month to month." HSBC said. "Even so, the gap this month is particu-larly huge and there must be a good chance of a down-

Outside the vehicles sector. there was a slight rebound from the previous annualised rise in sales in the past three months - 5.2 per cent - is slower than the Labour Department reported 8 per cent increase in the previous three-month period

in the beginning, persu

maras to grow drugs was a matter of simple arithmetic.

The 18th century mining and Colombia have begun to with logging companies settlement of Batopilas, deep in the heart of the Sierra Madre, exhausted its rich silver seams 80 years

But this unfriendly, forgutten town is booming. Brand new pick-up trucks line its cobbled streets, old adobe dwellings are being torn down to make way for modern homes, while dollars change bands as frequently

The source of Batopiles's new wealth is drugs. Nestling in small glades, con-cealed in the forbidding ravines of the Copper Canyon, in what is perhaps the most maccessible and rugged terrain of all Mexico, are thousands of hectures of cannabis and opium poppies. In September, when the marijuana harvest is in, drug traffickers will descend into the canyon and pay for the crop with maize, cash and

in the sheltered valleys of the sierra, where tempe and tropical zones intermingle, the poppies are "milked" three times a year. One hect-are of poppies will yield 10kg of opium gum, which in turn produces about 1kg of the crude "black tar" Mexican heroin now flooding the US. According to the US Drug Enforcement Agency, one kilo of Mexican heroin will fetch between \$45,000 and \$175,000 in the US, compared with up to \$260,000 for a kilogramme of purer heroin from south-west Asia, DEA documents suggest Mexico

displace Asia in the opium which are stripping the trade, Lest year more than Sierra Madre of its oak and 60 per cent of heroin seized in the US came from Latin

"The attorney-general's office in Mexico City, which oversees drug eradication, estimates at least 4,200 hectares of opium poppy and cannabis were being grown last year in the canyons to the south of Batopilas, in the state of Chihuahua, while US estimates place the cultithe Sierra Madre at 12,000

The figures, officials admit, are only wild guesses. Aerial reconnaissance is hazyous of the sierra, while vast tracts of the mountain range matter of simple arithmetic, have become no-go areas for By setting aside less than

One kilo of Mexican heroin will fetch up to \$175,000 in the United States

vernment which introduced the optum poppy to world war, when the Axis powers threatened to overrem Turkey and cut off the US's main source of morphine, an opiate used to treat surgery patients and the terminally ill.

Over the past decade, however, the cultivation of opium poppies has been taken over by Mexican drug new reign of terror in the cartels, often in association sierra.

Ironically it was the US land for cannabis and poppies, Tarahumaras were offered more than \$1,000 enough to pay for a whole year of supplies for a family. But as the drug and timber trades grew increasingly profitable, logging compa-

nies and cociques, or local

THIRD FISCAL REVISION THIS YEAR

Caracas forced to adjust budget after oil price dip

The Venezuelan government is readjusting the 1998 budget for the third time this year and is seeking to refinance as much as \$1.4bn in unspecified obligations, as oil prices have slumped to historic lows and market condi-

tions for raising debt have deteriorated. Maritza Izaguirre, finance minister, announced yesterday the government would recalculate this year's budget on an oil n already re-estimated \$13.50 per barrel and would seek to refinance certain operations" worth \$1,4bn. With each dollar per barrel representing \$900m in government revenue, this year's shortfall exceeds \$55n. This week the .

price of Venezuela's oil fell below \$10 per barrel. Teodoro Petkoff, planning minister, told the daily El Universal the state oil company PDVSA would have to cuit spending by an additional \$800m this year, on top of previous cuts of \$2.4bn. The government presented its proposais to a team from the International Monetary Fund visiting Caracas under a shadow programme signed with the government earlier this year. Raymond Colitt, Caracas

ARGENTINE LABOUR REFORM

Union protests delay bill

Arcentina's lower house failed to begin voting on a controversial labour reform bill on Wednesday, amid violent protests outside Congress by unions opposing the bill. The ruling Partido Justicialista (Peronisis) was unable to assemble a quorum, falling 15 short of the 129 deputies

needed to vote on the bill. Debate on the proposed legislation, which the government has tried to pass for the last two years, is expected to resume next Wednesday. The bill, approved by the Senate, has the support of Argentina's main union, the Central General de Trabajadores (CGT) but rebel factions of the CGT oppose the legislation, along with the opposition

coalition, the Alliance party.

Humberto Roggero, leader of the Peronists in Congress, said several deputies had death threats in the days leading up to the vote. Andrea Mandel-Campbell, Buenos Aires

PUERTO RICO

Debate on 51st US state vote

Puerto Rico's senate yesterday began discussing a proposal for a December referendum to determine whether the island in the north-east Caribbean becomes the 51st US state. This year is the centenary of US administration

If the referendum is approved, Puerto Ricans will vote on December 13 on whether to continue the current quasi-colonial commonwealth relationship with the US, become

the 51st state, or become independent. In a 1993 plebiscite there was marginal majority support for retaining the current status. Five per cent of Puerto Plicans voted for independence. Canute James, Kingston

US TELECOMS CHARGES

Residential bills 'must be cut'

US consumer groups want federal regulators to make sure residential customers receive the same savings as large businesses from government-ordered cuts in telephone

The Consumers Union and the Consumer Federation of America planned to ask the Federal Communications Commission yesterday to require phone companies to pass to all customers any savings stemming from government-ordered reductions in "access" fees - the payments long-distance companies make to local carriers to connect

"We think everyone should get their fair share," Gene Kimmelman, co-director of the Consumers Union's Washington office, said yesterday.

The groups' fliing was expected to be made later in the day. Access fees, which are passed on to customers, often account for 40 per cent of the average \$22.50 monthly residential long-distance bill. AP, Washington.

dards in intellectual property protection. The country currently has no law to pro tect patented chemical and pharmaceutical products; its domestic patent law only recognises and gives protection to patented chemical

That has left indian companies free to find alternative methods of producing patented products, like pharmaceuticals, and has made India a flourishing base for production of pirated drugs. The US and other countries have long been pushing India to adopt a more stringent law to protect patents.

set to lose order for in whisky Texas dispute

isation is expected to issue a formal ruling soon that South Korea has discriminated against imports of whisky and other distilled liquors by levying higher taxes on them than on locally made spirit, known

Seoul claimed that soju and foreign distilled liquors were not in the same category of drinks and thus should be taxed at different rates, but a WTO dispute settlement panel has concluded that some competes directly with imported honors.

The US and European Union brought the case efore the WTO claiming the higher taxes on liquor imports amounted to a trade barrier. Soju, which is regarded as a working man's drink in Korea, is taxed at 32.5 per cent while imported spirits, which are considereda luxury product, are taxed at 100 per cent.

The EU and US acknowledged that Korea had reduced the gap between taxes on soju and other spirits since 1993, but the diference remained "significant". Two rounds of talks between the two sides last vear and a meeting organised through the WTO had failed to resolve the issue. Korea is expected to

appeal against the finding once the WTO's dispute settlement panel approves it in September: but western diplomats in Seoul believe the decision will not be over

Seoul will have 15 months to introduce more equitable taxation on soiu and imports by either raising duties on soju or lowering them on imported spirits. The Korean ruling is similar to a case involving shochu in Japan. which it lost in 1996. The EU had warned several times during the WTO case on Japanese liquor taxes that the "clock was ticking" for

S Korea | Shell rig

Shell Philippines Exploration (Spex) yesterday said it had awarded a \$400m contract to Brown & Root Energy Services, a Texasbased group, to design and build an offshore platform in the southern Philippines.

David Greer, managing director of Spex, said the platform will consist of a 10,000-tonge deck and a concrete gravity substructure installed 43 metres beneath the sea and connected to deep water wells 800 metres

The Malampaya project, which envisages natural gas supply to the northern mainland of Luzon beginning in 2002, was "a landmark project in the global oil and gas exploration industry," considering the distances involved across open seas. Mr Greer said. The gas field lies 80km

from the south-western where a 500km pipeline will transport the gas to Batangas in Luzon. Until precently, the project was a joint ven-ture between Shell and Occidental Petroleum of the US, but it is now fully under the Shell umbrella.

"This is the largest ever investment in the Philippines' oil industry," said Rey of the Philippine Institute of Petroleum, a trade associa-tion. "We estimate that once the natural gas is in full flow, it will save the country 20 per cent of its crude oil the economy."

News of progress on the Malampaya project provides worsening economic outlook for the Philippines. The busiinvestment climate is deteriorating under President Joseph Estrada, whose administration is on the defensive after only six weeks in office, amid accusations of crony capitalism and a drift in policy.

Music's 'big five' dip toes in common distribution pool

INTERNATIONAL

DIPLOMATIC OPTION SADDAM URGED TO RESUME CO-OPERATION (US FACES POLICY DILEMMA

UN presses Iraq on arms inspection

in Washington, Roula Khalaf in London and Laura Silber rt the UN in New York

The United Nations special envoy to Iraq yesterday arrived in Bagndad carrying a firm message urging President Saddam Hussein to resume co-operation with UN weapons inspectors.

Prakash Shah, special envoy of Kofi Annan, UN secretary-general, delivered Mr Annan's message to Tariq Aziz. Iraq's deputy prime minister, in the after-

The UN Security Council, with Iraq, has been looking to the secretary-general to work out a diplomatic solution to the crisis, which erupted after the Iraqi government last week suspended co-operation with UN weapons inspectors. Iraq demanded that Unscom, the inspectors' commission, befree of weapons of mass

Mr Annan was promised that Iraq would co-operate with inspectors last February, when he defused an earlier UN-Baghdad crisis and averted a US and UK-led military strike on Iraq.

His attempt to deal with this crisis comes as the US government is facing criticism at home for seemingly softening its policy to Mr Saddam's defiant stance on weapons inspections. Mr Saddam has created a

dilemma for the US. In the last round of confrontation with Iraq in February the US realised the lack of appetite for a military strike, both at home and abroad. With France, Russia and China arguing for a softer policy towards Baghdad, Mr Saddam is also attempting to divide the Security Council even further, a move the US is struggling to resist. So instead of what the

White House calls a policy of "diplomacy backed by military action", today's approach appears purely diptook the initiative in Febru- very strong global reaction

Both countries were important backers of Mr Kabila in his eight-mouth drive to oust longtime dictator Mobutu Sese Seko. Mr Kabila assumed power in May 1997. Relations with his former backers have been **NEWS DIGEST**

FINNISH BUDGET

Helsinki to cut spending by 6 per cent next year

The Finnish government yesterday announced a cut in public expenditure of almost 6 per cent for 1999, following a new budget agreement among members of the country's five-party coalition. The government predicted total spend-ing next year would be FM186.8bn (\$34.7bn), with a forecast general government surplus of 2.5 per cent of GDP.

The ministry of finance warned that most areas of public expenditure would be affected by spending cuts or ferred investment, including construction projects, local authority grants, defence and support for the private sector. The cuts have been coupled to tax cuts, with income taxes for average wage earners falling to 35 per cent. When the coalition came to power in 1995, the rate was

Unveiling the draft budget, Sauli Nilnistö, the finance minister, said unemployment should fall to 9 per cent next year, down from almost 16 per cent when the government took office. GDP is expected to rise by 5.5 per cent this year and 4 per cent in 1999. Tim Burt, Stockholm

ENVIRONMENT CAMPAIGNING

Greenpeace donations decline

Smaller grants and "donor fatigue" led to a 10 per cent cut in the operating budget of Greenpeace last year, prompt-Ing the environment campaign group to change its fund-raising tactics. Thilo Bode, executive director, said Green-peace was reducing its canvassing activities, traditionally the main source of income, to pursue more long-term contributors via direct deblis. Total income fell to \$125.6m last year from \$139.9m in

1996. The Greenpeace director noted that donations from Germany, its biggest source of support, dropped last year. In Germany, "the environment has gone way down on the agenda. Jobs are now the biggest concern [there]." Greenpeace warned that at least 25,000 plant and ani-

mal species could die out and 20m hectares of ancient forest degraded or totally destroyed by the year 2000. The group's annual report recommends six urgent measures. They include a ban on all polyvinylchloride (PVC) prod-

ucts, a phase-out of nuclear energy, a global stop on lic-ensing of new oil exploration and a ban on industrial logging in ancient forests. Greenpeace, which has its nternational headquarters in Amsterdam, said that nearly 80 per cent of the world's ancient woodlands had already been destroyed. Jeremy Gray, Amsterdam

ASIA CRISIS

HK trade volumes shrink following slack demand

Trade volumes in Hong Kong shrank in the first half of the year, sapped by slack demand from neighbouring countries suffering from the Asian financial crisis. The value of Hong Kong's re-exports - goods rerouted mainly from China, the engine of trade in the territory - tell 1.6 per cent to HK\$566.1bn (US\$73bn) in the first six months of

But demand in Hong Kong itself was also weaker, as reflected by the 5.7 per cent decrease in the value of imports to HK\$724.1bn. Unlike many countries in the region, Hong Kong's imports are largely for domestic use rather than raw materials used for the manufacture of exports. Louise Lucas, Hong Kong

SINGAPORE

Plan to ease dollar guidelines

Lee Hsien, deputy prime minister and chairman of the Monetary Authority of Singapore (MAS), said yesterday his country was liberalising guidelines on use of the Singapore dollar. But he added that Singapore was not internationalising the unit and would not tolerate currency speculation. Mr Lee said a study had concluded that Singapore "should not encourage the internationalisation of the Singapore dollar" because the existing policy made it harder to mount speculative attacks on it.

He felt the restrictions hindered speculators who needed to borrow the Singapore dollar to short the currency and impeded the development of an offshore market beyond the authority's influence.

The policy "has an important deterrent effect, signalling MAS determination not to tolerate speculation in the Sing apore dollar", he said in a speech at the launch of a MAS

King keen on mediation

Cambodia's King Norodom Sihanouk yesterday said he was ready to mediate in his country's post-election dispute, which threatens to provoke a constitutional crisis

The ruling party of Hun Sen, second prime minister, won a slight majority in last month's election but did not get enough parliamentary seats to form a government. The opposition Funcipec party, led by the king's son Prince Norodom Ranariddh, and the Sam Rainsy party, led by the reformist former finance minister of the same name, have threatened to boycott parliament unless serious investigations into alleged voting fraud are launched.

The National Election Commission, stacked with supporters of Mr Hun Sen, has dismissed the fraud claims and is winding up its operations. If Funcipec and Sam Rainsy MPs boycott the first seating of parliament in late September, Cambodia could be left without a government.

The king said he would be willing to host an informal meeting of at least two parties to try to forge what many analysts see as an eventual coalition between Mr Hun Sen

Prince Ranariddh and Mr Rainsy have expressed interest in the king's idea. Ted Bardacke, Bangkok

CURRENCY TACTICS TIMING OF MONETARY AUTHORITY INTERVENTION HAS RAISED DOUBTS

Why the money markets are sniffing blood in Hong Kong

By Louise Lucas in Hong Kong to take the pain involved in est rates. This, in turn

The latest assault on the Hong Kong dollar has raised question marks over the role of the Hong Kong Monetary Authority (HKMA), the territory's de facto central bank and guardian of its hefty foreign reserves.

Acting on behalf of the government, the HKMA absorbed selling pressure over the past two weeks by intervening in the markets to buy Hong Kong dollars. The government needs the Hong Kong dollars to meet expenses, the HKMA are more than sufficient to explains. June to November fend of speculators. is traditionally the "dry"

costs more competitive with those of neighbouring countors and the government in been devalued.

The HKMA's intervention

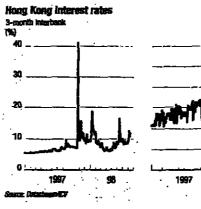

Its intervention has also invited a more protracted tug-of-war between specula-

the days ahead. "The slower rise in interest rates, and hence carrying-costs for borrowers, will enable speculators to sustain their attacks for a longer period of time," points out Eddie Wong, North Asia

economist for ABN Amro. "More rumours will be spread around. The stock market will face more pressure. Expect more fights in the next couple of weeks," he notes.

However, dismantling the peg would not bring relief to Hong Kong either. If the peg were dismantled, interest rates would rise and property prices would plunge. There would also be capital flight as foreign investors

Even so, maintaining the for us to switch finto Hong peg is proving painful. The Kong dollars]. We are adher- he warns.

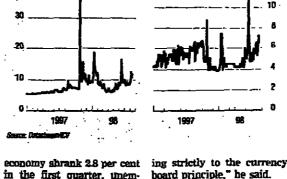

in the first quarter, unemployment is at a 15-year high of 4.5 per cent and the stockmarket is at 1993 levels. Thus, when the govern-

ment is seen to be tinkering at the edges of the currency board mechanism, the markets start to sniff blood. "Although this [buying of

Hong Kong dollars] is totally legitimate under Hong Kong's currency board sys-tem and is based on a genuine need [to fund the deficit], it is still more of an excuse than anything," says Mr Wong.

An HKMA spokesman demurs: "There were exactly

board principle," he said. But doubts have been sown, and capitalising on these doubts are the hedge funds and investment banks some of which have rushed out call warrants that will yield substantial profits for them if the Hong Kong dollar depreciates to HK\$7.6 from current levels over HK7.75.

With a long weekend round the corner in Hong Kong and its promise of thin trading, dealers reckon speculative activity will escalate. Mr Wong expects "a big showdown between the gov-

erament and currency specuthe right market conditions lators." If that happens, "both sides could lose big",

BARINGS COLLAPSE Proposed settlement for

bondholders faces delay

A proposed settlement that would have provided partial repayment for bondholders caught in the 1995 colleges of the Barings marchant bank has run into a second serious delay which could jeopardise the package. The settlement would produce payments of \$84m (\$138m) before expenses, on bonds with a face value of £190m. It was approved by Barings' creditors and holders of £100m of approved by Barings' creditors and holders of £100m of approved by Barings' creditors. perpetual notes issued in 1994, but a third meeting - of holders of \$150m in floating rate notes issued in 1988 was adjourned. The meeting, once recovered, failed to reach agreement and was adjourned agein until September 16. It is understood that vulture funds, which bought the notes at a discount, hope to win better terms and may have now been joined by other 1986 note holders. Parties to the deal are analous that the opportunity of settling may be lost as the deal may expire before the end of the year it

EXPORTS OF FARM ANIMALS

not agreed. Jim Kelly, London

Protesters gather at port

Animal welfare campaigners said yesterday they would mount a permanent demonstration against exports of live sheep, which are to resume between Dover, England, and Dunkirk, France, today. The English port was the scene of violent clashes three years ago, in which one demonstrator died, as thousands of campaigners tried to prevent truckloads of caives and sheep leaving the UK. Some groups said yesterday they would do everything possible to stop the trade re-establishing liself.

ROYAL AUTOMOBILE CLUB

Cendant wins sale vote

Members of the Royal Automobile Club have voted over whelmingly for selling the RAC's motoring services operations to Cendant, the US marketing group, for £450m (\$742m). The sale means the 12,000 full members of the London club headquartered at the capital's Pall Mall will each receive payouts worth between £30,000 and £95,000. Of the 84 per cent of members who voted, 97.7 per cent gave their approval. The sale requires the approval of competition regulators, as Cendant owns Green Flag, another big UK motoring services group. But it is thought unlikely there will be any referral to the Monopoles and Mergers Commission because Cendant faces the entrenched rivalry of the 9.4m member Automobile Association and other sizeable groups such as Mondial Assistance. John Griffiths, London See Cendant earnings in Companies & Finance

AGE DISCRIMINATION

Guidelines to be published

NO PROBLEM WITH ACEISM HERE - WE CET RID OF REDALE WHEN THEY TURN 50

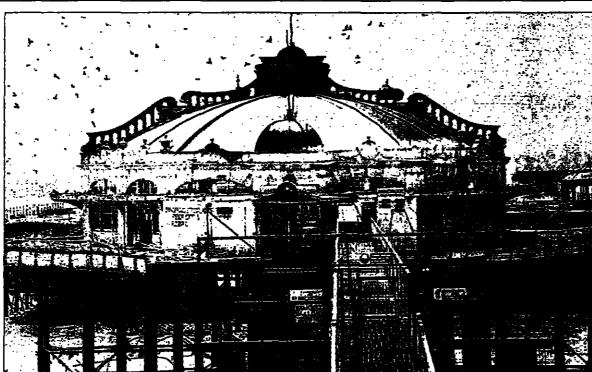

MAFIN

MERIR

The government will publish a voluntary code of practice this autumn to combat ageism but confirmed it was not prepared to legislate against it. Andrew Smith, employment minister, said employers could not afford to discrimi-

nate because one in four workers would be aged 50 or more by the year 2006. "This tackle the problem but cannot do so on its own," he said. "We have to work in partnership with business, employees and interested groups, as well as the public." The education and employment

department yesterday published the results of informal consultation. It showed that ace discrimination affected young and older people,

Clamour grows for rules on euro referendum

Opponents of the single currency fear Yes campaign will have unfair financial advantage, writes Liam Halligan he £15m (\$24.7m) cam-

paign by Lord Hollick and other senior business executives backing Britain's entry into the single European currency will bring further protests about the lack of financial guidelines governing what is likely to be a highly contentious referendum.

The business group, to be launched in the next few months, will be headed by Lord Hollick, chairman of United News & Media and a supporter of the governing Labour party. The new organisation, which will have supporters in all main political parties, is expected to take over the lead role in the pro-euro campaign from the long-standing European Movement. which some senior Labour party figures consider too uncritically pro-EU.

"You're jumping the gun by several years," replied billboards and airwaves.

one government official when asked if there would be any campaign funding limits when the referendum on participation in the single currency, expected in 2001 or 2002 is contested via Britain's newspapers, But the opposition Con-

servative party, in conjunction with a collection of independent constitutional experts, has called for the creation of referendum rules. "Referendums must be conducted fairly, and there are presently no rules," says Liam Fox, Conservative constitutional affairs spokesman. His call was echoed, from

across the political spectrum, by Charter 88, the constitutional campaign group. "Referendum guidelines are crucial so the results are unequivocal." said a spokesman for Charter 88. "We need funding limits, with state funding being considered, especially where one side could get so much more money than another."

Part of the reason Conservatives, most of whom vehemently oppose Emu, are pushing for limits is that the pro-single currency camp is likely to be so much better funded than the No lobby.

Business for Sterling, the anti-Emu business group iaunched in June, says it is "unlikely" to win the finan-cial contest. "We've reached £1m in donations, but because of European Commission money, and other government-funded propaganda, we'll have to arguments," said a spokes-

Anti-Emu campaigners say the Yes campaign's financial firepower will

partly reflect the backing Union altogether - turns of big business. "UK multi-off most potential business nationals are giving the British Yes vote money to keep them on board with Labour and other pro-Emu governments on the continent," says one. "In contrast, many No supporters are small firms who cannot

shell out on politics." Certainly, the Federation of Small Busine staunch anti-Rmu line. "We're against - 80 per cent of small businesses trade solely within the UK. and for them Emu represents nothing but costs,"

said an official Another fundraising problem for the No camp is the squabbling within its ranks. The anti-Emu lobby comprises about 30 splinter groups, most of them associated with the right wing rely on the strength of our of the Conservative party. The penchant of many No groups to go beyond

opposing Emu - with a large number wanting the UK to quit the European

off most potential business grounds that an "anti-European" campaign against Emu is unlikely to be a success.

The No campaigners complain that corporate donations they do receive come from businessmen who are themselves politically active. Lord McAlpine, the for-

mer Conservative party treasurer, who played a leading part in the success ful campaign in the 1975 national referendum on membership of the European Community, but who backs the present campaign against Emu says referendum funding limits are even more important than general (national) election campaign spending controls.

"General election results can be reversed after five years," he says, "But referendum results last for-

Foreign secretary urges curb on Brussels

By George Parker,

Political Correspondent

Robin Cook, the foreign secretary, has called for a range of measures to curb the power wielded by Brussels and to transfer responsibilitles to European Union member states.

Mr Cook called for a new EU code in an interview law. with New Statesman magazine, setting out the responsibilities of EU institutions and those of individual

REPUBLIC OF CAMEROON

MOBARAKEH STEEL COMPANY

MINISTRY OF THE ECONOMY AND FINANCE

INTERNATIONAL CALL FOR BIDS FOR THE PRIVATISATION OF THE CAMEROON INSURANCE COMPANY (SOCAR)

As part of its program of restructuring and privatising public and semi-public enterprises, the Government of Cameroon wishes to establish two new insurance companies (one general insurance and the other life insurance), in collaboration with private sector investors, to replace SOCAR insurance Company.

Cameroon is at the centre of an economic and monetary union (CEMAC) grouping six countries in central Africa. Investors will enjoy immediate access to the insurance markets of Cameroon's neighbours.

SOCAR was created in September 1973. Its shares are held by the Cameroonian government (36%), publicsector entities(20%) and various foreign interests (44%). For many years, SOCAR was the most important insurance company in not only Cameroon but also in francophone Black Africa.

An international call for bids is being launched to find a shareholder to acquire a majority stake of at least 51% in the new companies. The minimum amount of capital is set at CFAF 2 Billion (FF 20 Million or USD 3.33 Million) for the general insurance company and at CFAF 250 Million (FF 2.5 Million or USD 416,000) for the life insurance company.

Parties seeking to take a majority stake in either of the two new insurance companies should be insurance or reinsurance companies with reputable and financially sound backgrounds. The government will allow companies without the necessary insurance or reinsurance expertise to take a majority stake in the new insurance companies under conditions spelled out in the information memorandum and terms of reference.

Potential Investors can obtain an English or French information memorandum on this privatisation project along with a complete package of tender documents by contacting the individuals noted below.

Investors can join with Cameroonian or foreign interests to submit a joint bid. Those investors willing to take a minority interest in the new companies can submit an expression of interest to the Insurance Division of the Ministry of the Economy and Finance's offices. Once the winning bid has been selected, they will be advised of the price of shares established through the bidding process and invited to subscribe for shares at that same price. Bids should be received by no later than Thursday, October 1ª at the Ministry of the Economy and Finance's

Great hopes from little loans grow

The fight against poverty is the driving force for a Bangladeshi banker, says **John Authers**

"Poverty." says Muhammad Yunus, "is something like a bonsai tree. You get only this little base to grow from. You are a stunted little thing. Maybe you could be a giant thing, but you never find out - that's poverty." Few people have seen

more of poverty at first hand, or done more to combat it. Mr Yunus has brought a startling brand of entrepreneurialism to his native Bangladesh, where it is flourishing. His Grameen Bank, started when he made loans worth \$27 (£16) out of his own pocket to 40 people, now has more than \$2bn in ioans outstanding.

Grameen is now one of the world's largest "microlenders". Its loans still average barely more than \$100, and go to help people set up small enterprises in rural Bangladeshi villages. The loans have no collateral, and carry a relatively high interest rate. They are made to people who would not be considered credit worthy by almost any western financial

Yet Grameen loans have a repayment rate of 98 per cent - the kind of level that US banks can only dream about. The bank now has more than 12,000 employees. and more than 1,000 branches serving 37,000

Mr Yunus has become a powerful agent of social and although he did emphasise technological change. Grameen has lent to more than 2.3m people, at least 90 per cent of whom are women. Most are also illiterate. Voter turn-out among the

poorest countries into a nation of entrepreneurs. "My concept is not just poor. My starting point is that all human beings are entrepreneurs. Some get a chance to express it. Those who never had the chance probably believe they are not entrepreneurs. By creating access to credit, you give an opportunity to someone to find out what's inside of

him or her." Grameen is also helping to connect rural Bangladesh to the global communications network. One scheme involves renting out mobile who then loan them to other villagers for a profit. This scheme has turned Mr Yunus into Bangladesh's largest telecommunications

Grameen is also now the country's largest internet service provider, having extended computer equipment and online links into villages in the same way.

'Credit should be accepted as a human right. It's the beginning of economic life'

At a summit in New York in June he attempted to persuade the most powerful Wall Street investment houses to find ways to invest in micro-credit. This would be on a business basis, that banks should be looking for a "social-objectivedriven" return, rather than pure commercial gain. A summit last year had aiready set the goal of

by 2005. Like many others in the industry, he does not believe this can be achieved without tapping western capital markets.

Mr Yunus is exploring ways to securitise his loans a once unimaginable event and float them on the international capital markets. Many US banks seemed impressed. Unconventional schemes to help underpin the balance sheets of microlenders were announced at the conference by both Bankers Trust and Citicorp. Both expect to make a lower one than they would normally require for a business proposition.

And he has branched out in other ways. He also chose New York as the venue to announce that he was forming a joint venture with Monsanto, the life sciences company, to set up an agricultural research centre in Bangladesh. This will apply the latest technological advances to improving the country's agricultural

people it lends to is almost extending micro-credit to Bangladesh, the two compa-to help. Grameen has grown used to it we think it's a 100 per cent. It is steadily 100m households worldwide nies hope it will produce steadily since then, gaining matter of fact."

solutions that are relevant to a country with a subsistence culture. It will work on genetic engineering aimed at providing more resilient crops and will also provide recommendations on cultivation and other agricultural methods

All of these developments stem from Mr Yunus's clear and sophisticated philosophy, which bears the marks of his previous career as an economics professor in Dhaka. "In that context you are teaching beautiful economic theories in your classreturn on investment, but a room. You have beautiful solutions but then you go out of your classroom and you see people dving."

His first venture into lending came in the wake of the floods that hit the country in 1974. The scenes of devastation, soon after Bangladesh had claimed its independence from Pakistan, created worldwide concern and inspired the famous Bangladesh concerts with George Harrison.

For Mr Yunus, making small loans out of his own By placing the centre in pocket seemed the best way

the status of a bank in the process. Mr Yunus himself has not profited greatly, however, and he does not have a personal stake in the company, which is mutually

"Shares are held by the borrowers themselves. I'm not a shareholder. I'm just

While he has a strong enough grasp of business to impress the world's most powerful financiers, he is driven by an uncompromising determination to fight poverty in whatever form it

"I would say it's economic democracy. When you deny access to credit because someone doesn't have collateral you are creating a situation of financial appetite. That's such a basic need of human beings. Credit should be accepted as a human right. It's the beginning of economic life.

"We get very concerned when one human being's rights are violated for one individual but when over a billion people are denied their human rights we get so

HEALTH ANTISENSE THERAPY

Magic bullet rebounds

Victoria Griffith on a treatment that has received a fresh vote of confidence

It was once so affect only the proteins that dubbed the magic disease Proteins, secreted by bullet. Antisense therapy, a cells, regulate bodily functions and are implicated in if this can be accomplished. ogy, was heralded as offering most illnesses. cures without side effects. But its development over the last decade has been dogged by disappointment, as compound after compound failed in the laboratory.

Yet late last month, the world's first drug using the a Food & Drug Administration (FDA) advisory commit-

The recommendation of Isis Pharmaceuticals' antisense treatment for an Aidsrelated eye disease was an important vote of confidence. "It was a landmark decision," said Dr Eric Wickstrom, a leading antisense earcher at Jefferson Medical College, Philadelphia. "Isis has shown that these drugs are, indeed, practical and effective."

While Isis' treatment has not vet received full market clearance, it is extremely rare for the FDA to refuse approval after an advisor: committee has given a product its blessing.

In spite of the good news, most antisense drugs are a long way from market, and the technology remains con troversial Research is still largely in pre-clinical phases that is, the compounds have not been tried on

humana.

After being hailed as one of the most promising technologies in the field of biotechnology in the late 1980s. antisense fell out of favour earlier this decade. Gilead and Lynx, early pioneers in the field, have dropped the technology to concentrate on other techniques. One of the leading antisense companies, Hybridon, which has done some important research on antisense and Aids, is financially troubled.

approval with understandable relief. Yet it is probably too soon to sound the victory bell.

Antisense has been called the "magic bullet" approach because it is designed to

promising it was are directly involved in a

When the DNA of a cell is faulty, its protein production goes awry, meaning either target cell. The body is too little or too much of a extremely efficient at breakcertain substance is manufactured. In the case of diabetes, for instance, pancre-research in antisense has atic cells lose their ability to make insulin.

Genetic therapy directly targets the DNA to resolve such defects. Antisense, proponents argue, is safer because it leaves the central DNA alone to concentrate on RNA messenger molecules, which relay information from the DNA to the rest of the cell. By avoiding the DNA, the danger of contaminating other cell functions may be reduced.

Antisense is a strand of a genetic code designed as a mirror image of the faulty RNA messenger. By overlay-

One of the challenges of antisense is to get the drug into the cells

rupts communication between the nucleus and the rest of the cell. Because the cell never receives the false information, its protein production returns to normal. In theory, the treatment should produce no side effects, because the drug does not interfere with any other cell function. In reality, the technique is riddled with problems.

One of the challenges of antisense is to get the drug ense to stave off cancer in into the cells. To bind with. Believers in antisense one among some 30,000 mesgreeted last month's drug senger RNAs in the cell, the for Crohn's disease, an gene sequence must be exact, and to gain that precision, the molecule must be relatively large. Yet the larger the molecule, the harder it is to penetrate the

utive of Isis says that by distilling the gene sequence down to only the essential items, the molecules used in the drug runs the risk of being broken down in the body before it reaches the ing down strands of RNA. which is why much of the centred on strengthening the treatment's "backbone" – by altering its chemistry slightly - to get it to last longer in the body.

The "second generation"

of antisense backbones seems to hold together better than its predecessors. Yet even these molecules are eliminated from the body at alarming speed, in many laboratory tests, just 5 per cent enough to reach its target. making dosing a nightmare. Isis circumvented this problem with its new treatment by applying the product directly to the eye. "But that kind of local application is not feasible for most illnesses," says Frank Tung, a researcher at the Limversity

of Pittsburgh in spite of the challenges, promise for deadly conditions such as cancer. Through traditional testing and elimination methods, it seems, scientists can eliminate many of the drugs' neg-

The privatisation methods of the ROMANIAN BANK FOR DEVELOPMENT will be to :

O sell to a strategic investor, or to a group of strategic investors through direct negotiation with bids selection, newly issued and state owned (managed by the State Ownership Fund) shares accounting for 51% of the increased share capital:
O sell to institutional investors - EBRD and IFC, through direct negotiation, shares managed by State Ownership Fund accounting for 5% of the increased share capital:
O sell to the bank employees, according to the legislation in force, shares accounting for 10% from the existing registered share capital:
O sell the remaining equity interest managed by the State Ownership Fund to portfolio investors, foreign and domestic natural or legal persons, through secondary public offering.

The Sile-Purchase Contract with the strategic investor or the group of strategic investors will include clauses in order to maintain the Ron the ROMANIAN BANK FOR DEVELOPMENT, such as to:

preserve the name and identity of the bank:

preserve the innovation capability and devel

preserve treasury autonomy: preserve the innovation capability and develop new products: 3 secure independent access of the bank to capital markets;

There are invited to submit their Letters of Intent the interested parties which fulfil the legal requirements as follows: Law no.83/1997, article 14 (1) "Romanian or foreign, natural or legal persons, who operate directly or indirectly, individually or jointly and related to third parties, can not get ownership right on shares accounting for over 20% of the total registered share capital of a bank to be privatised under this law, except for highly reputed international finance and banking institutions are exempted."

G.D. no.428/1997, article 32 "It is the National Bank of Romania that establishes which of the bidders in the bank privatisation are highly reputed international finance and banking institutions, as referred to in article 14 (1) of the law.".

Letters of latent are due to be submitted by August 28th, 1998, 16.00 hours (14.00 GMT), to RBD Privatisation Commission, headquartered in Bucharest, 6

Stavropoleos Street, sector 3, 2nd floor, room 86. The Letter of Intent will also contain the following information:

O name and address of the interested party and the designated contact person;

O corporate profile and main fields of activity: O brief description of the activity performed in finance and banking (central and eastern Europe included, if such is the case)

O preliminary intentions concerning the ongoing development of RBD.

The Letter of Intent will be of no more than 10 pages, and is due to be handed in scaled envelope, in three original copies in Romanian and three original copies in English, duly authenticated by public notary. The audited report for the 1997, in English, has to be enclosed thereto. On September 1st, 1998, the RBD Privatisation Commission will announce directly and/or by fax, those senders of letters of intent who have obtained favourable approval from National Bank of Romania, to compete in the purchase the equity interest of 51% of RBD shares, according to the Law no.83/1997, article 14 and the G.D. no.458/1997, article 12. These will be invited over the privatisation Commission office on September 4th, 1998, 16.00 hours (14.00 GMT), for signing the Confidentiality Engagement, purchase the Tender Book which will contain also the Information Memorandum and to draw lots on the order of making due

diligence in RBD. The due diligence will be made between September 7th and October 7th, 1998. By October 15th, 1998 hours 14.00 GMT), binding offers for the purchase of the equity interest put up for sale have to be handed over at the Privatisation Commission's office. Only the interested parties that have purchased the Tender Book and meet the conditions provided therein can submit binding offices. On October 19th, 1948, 11.00 hours (19.00 GMT), at the RBD Privatisation Commission office, DIRECT NEGOCIATION for the sale of the stock of 51%

of RBD shares will begin. The contact person for any information regarding RBD privatisation is Mr. Dan PREDOIU, phone/fax:00401/3036389.

The RBD Privatisation Commission.

DAVID BOWEN WEB SITE INSPECTION

Expectation melts

Häagen-Dazs fails to create a brand-building site that is useful

Häagen-Dazs is wonderful stuff. In addition to a splendidly silly name, it has taught many people what ice cream is supposed to taste like. And, through its advertising, it has brought food and eroticism closer than Freud could ever have thought possible.

But what, I wondered, could it do on the web? Brand-building sites are notoriously tricky because there has to be some reason for people to go to what is, after all. just one advertiser thousands. Unfortunately Häagen-Dazs does not seem to have asked itself this question. Here we have a site that is more like candy floss than ice cream: it looks substantial, it is quite pretty. but there is almost nothing

The soft focus picture of a Häagen-Dazs tub on the home page raises hopes of spoof erotica to follow. The accompanying copy is surely a spoof: "When you take a breath... before the first kiss, capture temptation . . . in a touch stir passion . . . with a whispered

promise. As I read on, I realised that this was not spoof bad copy, this was sincere bad copy. So bad indeed that I enjoyed the site much as I would a truly terrible film. Here's a spoonful: "It's nice to meet someone who doesn't have issues with

The site has two vaguely useful features. One is a locator button to find the nearest Häagen-Dazs café. The other is a selection of recipes. You get to these by joining the Perfect Rewards Club, which requires giving information about your ice cream eating habits. If I am going to give up personal data to a company I want

rather more than Häagen-Dazs offers in return. The form also has the all-too-common irritation of refusing to acknowledge non-US addresses, even though the site's information is international. Strange, given that the brand's owner, Diageo, is Navigation is fine as long

as you know what buttons. labelled "Inspirations", "Elements", "Settings" and "Experiences" are supposed to signify. It looks quite pretty too and was certainly not cheap to produce. This site is a useful guide to wasting money on the web. Other brand-builders should examine it carefully and do otherwise www.haagen-dazs.com Overall * Design *** Navigation ****

The concept of a web site for a film is faintly bizarre – by its nature it cannot match the experience of the film, the impact of a poster or the inforgret-profit.co.uk).

does the site for Dr Dolittle bring to the online party?

The answer is a surprising amount. It gives you the chance to see an 80-second trailer for the film, if you are prepared to wait 25 minutes while it downloads. It also lets you listen to clips of the soundtrack and order the album online, download screensavers and send electronic postcards to your chums. There is a fair amount of information about the plot. But in spite of the Hollywood slickness this site is little more than an elaborate commercial.

www.drdolittle.com Design *** Navigation ***

Matinee, a software company from Reading. England, says its site is "the future of the web". It's certainly different. The site is more like a graphical video than a normal web site: electronic music thumps away behind a screen constantly full of movement. Even the delay in loading various elements is turned into a virtue by announcing their arrival with explosions and other aural shocks. Have a look and see what you think.

APPOINTMENT ANNOUNCEMENT

Pat Geary has joined Searchspace, the Intelligent Systems company, as their new Sales and Marketing Director. His last appointment was as Worldwide Marketing Director at Sequent Computers, and previously as Corporate Marketing Director at Digital Equipment Corporation responsible for the Enterprise systems business.

OPERA SANTA FE FESTIVAL

The mission's accomplished; it's time to let go

Andrew Clark wonders if founder and director John Crosby can bear to hand over his baby

You reach the Santa Fe Opera by driving six miles out of town on the road to Los Alamos. Until you actually see the theatre, you can have little idea how unlikely is its setting. Built into the side of a hill, with panoramic views of the Sangre de Cristo mountains, it shimmers like a mirage in the sun-baked desert. You leave the highway and drive up a winding path to a small plateau, and there it is brown adobe walls, white roof with gleaming masts, open ter-

Close-up, you feel as if the whole construction is suspended beneath a giant glider. Inside, it has the atmosphere of a Greek amphitheatre - except that, for the first time in its 42year history, the Santa Fe Opera is fully covered. The auditorium is completely new, but the shape and style of its predecessor has been respected. The wind still breezes through open sides. the sunset remains visible behind the stage, and the backstage area is much as before. But at last the theatre is weatherproof. The seats are comfortable, the sight-lines good, and the acoustic is kind to voices.

John Crosby, the company's founder and 72-year-old general director, recalls opening nights in the early years when audiences would turn up in black tie, sit on

A STORE P

Vandross provided the preen-ing decade's soundtrack with some of its most eroticised moments. While all around him were anxious to look as ridiculous (pirate outfits) or miserable (black overcoats) as possible, Vandross smooched his way into lounges everywhere with his honeyed come-ons and effortless falsetto leaps.

It was, to be sure, an ersatz eroticism; one only has to listen to Marvin Gaye to hear the genuine, less than wholesome article. But Vandross's creamy crooning slotted in nicely with the shallow

What does he say to us today? IKnow, his first album for EMI, is trailed as being the first over which he has exercised "true creative control", but this frankly

After a few false starts, here sounds like mildly bitchy record company-speak. What you get is largely what you expect - wellplayed, polished, nicely settled into an uncontroversial groove. Much of the credit for this care-

fully-crafted sound goes to Marcus Miller, who has writing, production and bass-playing credits Vandross and rap go

together like custard and broccoli

on various parts of the album. There is something endearingly old-fashioned about Miller's playing in an age in which rhythm sections have become essively mechanised.

Add the odd virtuoso moment from Bob James (an impressively laid back Fender Rhodes solo on "I'm Only Human") and Stevie Wonder (harmonica on the title

track), and you have a rather refreshing, warm sound, perfect for those torpid summer eve-

BRECON JAZZ FESTIVAL VAN MORRISON, PETRUCCIANI, MARSALIS . .

Impro, rhythm and blues

a unique event in all Europe. The iazz music - from swinging mainstream to artful abstraction by way of blues and gospel.

Van Morrison passed through

all those areas in a rumbustious festival opener on Friday night. Belfast's spiritualised bluesshouter mugged and chortled through classics "Tupelo Honey", "Crazy Love" and even "Moondance", before accepting requests for more of the same. The curmudgeonly one's unpredictability always give his shows an extra charge. This night it was the Man's demoniacal good humour that put both band and audience on edge, lending the performance an electric and deliciously dan-

gerous atmosphere. Where the Market Hall's murky acoustics were simply overnowered by Morrison's bellowed angst; the sound quality presented more of a problem for the French planist Michel Petruc-

tations - he is only three feet tall Welsh town is simply the most - and leans into the keyboard convivial place to experience live with full two-handed percussive force. At times, and through no fault of the musicians, bass notes from each protagonist seemed to weld together. All was clearer in the Latin tinged mid-tempo numbers, the rhythm section carefully bisecting Petrucciani's note-

> packed lines. Not only does Petrucciani bave a huge store of improvising material and an incendiary right hand delivery, the driving left band ioins his ideas into a fast moving train of purposeful momentum. Original compositions have witty adornments which compare with Oscar Peterson, but he comes into his own when interpreting Ellington. On Saturday, an "A Train" variation was brought shunting and squealing from its siding and pulled into an unstop-

pable, fire-breathing express. Saxophonist Branford Marsalis loped onto the same stage two hours later to set free an uninterciani, backed by drummer Steve rupted stream of improvisation She communicates the bitter-

Watts and bassist Eric Reevis. the eldest of the Marsalis siblings linked frantic bop to calypso by way of shimmering ballads and furry-toned blues. Lesser players would lose their audience, but the empathy between the Mar-

One of the hottest tickets in town was for vocalist Stacey Kent and her hand at Christ College. The young New Yorker, who started singing just five years ago after settling in London, is an articulate interpreter of the great American songbook

ar songs in brightly swinging afternoon, pianist David Newton and breathy tenorist Jim Tomlinson who together embody taste has moved, ever so elegantly. Nearly one hundred gigs, spread with the times. Thus the album's around meadows, marquees and closer, a Rodney Jerkins remix of a market hall make Brecon Jazz makes light of his physical limitation. Which lasted nearly an hour and and restraint, provided the perwithing the distribution of plants. Backed by the dream fect setting for classics such as closer, a Rodney Jerkins remix of a market hall make Brecon Jazz makes light of his physical limitation. Still Of The Night

At the Theatr Brycheining tenor titan Joe Lovano demonstrated how to blow new life into the songbook - by turning the tunes inside out. Lovano, who rivals Sonny Rollins for fire-power coupled with vocabulary. has a similarly idiosyneratic repertoire, drawing inspiration from such disparate sources as Sinatra and Monk. The quartet features another big-hearted player, planist Kenny Werner, whose fluid. quicksilver solo parts were a corefully drawn counterpoint to the leader's full-blooded runs. That Lovano and his group could play two consecutive shows at Brecon says as much about his stamina as it does his popularity.

The 32 headline concerts are only a part of Brecon Jazz; the fringe often provides the unexpected gems. So if there is a problem with the festival, it is how to be in several places at one time.

At 08:20 Tanya Beckett of FITV reports live from LIFFE as the London market opens.

Asian countries want to tap the international bond markets. But, say Simon Davies and Jeremy Grant, they are being asked to pay basket-case premiums

or international banks, one of the few benefits to emerge from the Asian crisis is the ravenous appetite for capital from once-frugal south-east Asian countries. But setting terms that suit both lenders and borrowers is not easy.

10

High savings rates and OC balanced budgets in the region left little room for a debt market. On the contrary, Asian governments lent to the west west Now the tide has turned. The collapse of banking systems and the blurring of lines between public and private sector borrowing has hugely increased government demand for international

> This week, the Philippines issued a mandate to Goldman Sachs to launch a \$500m issue. Seoul, Bangkok, Kuala Lumpur and Beijing have issued mandates to borrow a total of more than \$5bn. But lenders are wary. If these issuers had come to the market just 18 months ago, they would have been greeted with open arms. Today, they are all but

> Before the financial crisis, Asian borrowers were paying an average coupon of 1.5 percentage points over the yield on the US Treasury long bond. At current market prices they would have to pay closer to 5.5 percentage points over. The risk premium has tripled.

Neither are markets distinguishing between countries. Korea, Malaysia and Thailand are trading within a whisker of each other attractive an opportunity as story should be able to bordespite a wide range of credit ratings. Last month. Malaysia decided it was being asked to pay too much and delayed a \$2bn eurobond issue. That casts doubt on borrowing plans by Thailand and China.

For the moment, Asian countries can afford to delay since many have clinched rescue packages from the International Monetary Fund. But sooner or later they will need to borrow to service their debts, to recapitalise ailing banks, and to files more to investors' finance fiscal deficits.

ancing so far has been from the multilaterals. But there has to be a several-pronged approach to financing," says Amer Bisat, emerging market analyst at Salomon Smith Barney, "A significant share of that will have to come from international cap-

Some traditional routes may be blocked. Syndicated loans, for instance, may not be an option. "The banks that have lent to the region are under substantial pressure because of their existing non-performing loans," says Carlos Cordeiro, managing director of debt capital markets at Goldman Sachs in Hong Kong. "I think the bond markets provide as anything else out there."

for would-be borrowers: securitisation. When Chrysler, the US carmaker, had a ments have persuaded the junk-bond rating in the early markets they have taken the 1990s, it raised relatively necessary steps. low-cost funds through issuing bonds collateralised by ments need to be creative the cashflows from assets such as motor loans.

L'Ecosse Libre

hree French words sum up the growparts of Scotland's business community as next May's elections for the new Scottish parliament draw

What, I asked the chief executive of a leading company in Edinburgh this week, most worries business about the current state of Scottish politics. His reply, uttered through clenched teeth was: "Le Quebec Libre".

You can see what he means. The Scottish Nationalists, with their pledge of a referendum on independence, are on a roll, repeatedly beating the Labour party in opinion surveys.

Could their canny leader, Alex Salmond, beat Labour's Donald Dewar to become the country's first "first minister"? More important, is Scotland becoming Britain's Quebec - perpetually at odds with the rest of the state. constantly chafing at its link with the centre, fomenting political instability and eco-

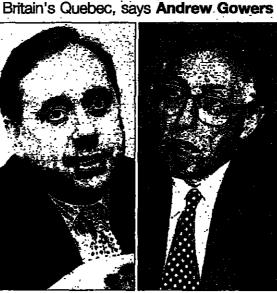

nomic uncertainty? If so, more than the business community should be worried. Victory for the Nationalists next year would pose a grave and immediate challenge to Tony Blair's government. But even a strong Nationalist showing in the elections, with Labour emerging as the largest party, would seriously complicate the task of governing Scotland - and by extension the rest of the UK.

Contemplate for a second what life could be like with such a parliament. Few Scots, after all, believe the SNP will be anything less than a powerful challenger next May. Scotland's devolution set-

tlement, strongly endorsed by referendum in the wake of Labour's general election victory last year, then takes on a provisional air. The wrangling and rancour with London increase - to the advantage of the Nationalists and the disadvantage of Labour. The tide runs on towards a Nationalist victory in 2003 and an indepen- a more Blair-like promise of . It is this sentiment, rather dence referendum not long good governance for Scotafter. The ambitious reshaping of the UK constitution by a Labour government plausible, sly and deceitful. dominated by Scots starts to

like this. When Labour middle England; Tony Blair media baron Gus Macdonald until they vote yes.

Nationalism is turning Scotland into

The "sleekit" Salmond, and Dewar, who will be First Minister?

rammed through its devolu- is viewed as out of touch tion proposals following its general election victory, it aimed to satisfy the Scots' dency to oppose whoever appetite for home rule. thereby consolidating Scotland's position in the union. Mr Dewar, the Scottish

secretary and likely first minister, thought he could ride the wave of enthusiasm from the referendum into a comfortable Labour victory next May. Thus empowered, and building on close relations with the London government, he would set about producing policies that responded more closely to Scotland's needs and wishes. Instead, Mr Dewar now

has the weary air of a man under siege. He has been genuinely surprised by the Nationalists' strong showing in the polls. His party is divided, and in places corrupt. He has made mistakes that have fed the SNP's propaganda machine.

Perhaps most serious from the point of view of the comframing a counter-attack. Mr Salmond, the SNP leader, is a uniquely slippery target. constantly shifting his emphasis between the campaign for independence and land. Citing Burns, Mr But Labour's problem goes

with Scottish concerns. That exacerbates the Scots' tenoccupies power in London. Given their own parliament, why would they not vote for a party that vows to put Scotland first?

Mr Dewar has two sponses. He attempts to pick apart Mr Salmond's arguments on the politics and economics of independence. And more sotto poce. he warns that a powerful SNP could put at risk favourable treatment of Scotland within the union. whereby it receives, for instance, higher public spending per head than other parts of the UK.

Neither approach is likely to work. The arguments about independence are abstruse and confusing, and many voters will feel they can be left for an eventual referendum campaign. Whether or not Scots are indeed better off within the ing election campaign, he is union than outside it, most having obvious difficulty do not feel they are Resentment that remote rulers in London conspire to do the country down is as ingrained in the national consciousness as the flavour of peat in a fine malt

than the desire for independence per se, that is probably Dewar calls him "sleekit" - driving the SNP's poil rat-Labour's team ~ newly

as minister for business and industry - needs distinctive

flavour. But there is little sign of any such policy platform Office. And it is hard to see Mr Dewar fashioning a manifesto containing ideas significantly at odds with those of his New Labour colleagues in London.

There is a strong chance, therefore, of Mr Salmond becoming at least a powerful opposition leader in the Scottish parliament. He could find himself in a position to claim shared credit for its successes, and, more important, to blame its failures on London and its Labour puppets in Edinburgh.

So what, you may say: the Scots do not really want full-blown independence. and would almost certainly vote the idea down if a referendum were held tomorrow. Even if the SNP were to win the second elections to the parliament, due in 2003, it would not necessarily mean independence was round the corner.

Perhaps not. But that is not the point. What worries business is the prospect of endless uncertainty and altercation over Scotland's status, rather than the nature of an eventual settle

Hence the gritted-teeth reference to Quebec. Voters there have for decades elected pro-independence provincial governments and then turned down independence in referendums. The effect of the uncertainty on Quebec's economy and on Canada as a whole has scarcely been salutary. And the Bank of Montreal long ago moved its head office to Toronto.

The optimists prefer the example of Catalonia. There, voters have long elected a strong regional government intent on boosting their region's interests within Spain rather than on secession. The dominant regional party thrives by keeping its distance from the parties in Madrid - and now holds the balance of national power.

But that is, for the moment at least, not Mr Salmond's tune. He insists that ings up. To counter it, independence is the aim, and that his party will, Quebecdeeper. It is now seen by reinforced with the contro- style, put that idea to the It was not supposed to be many Scots as the party of versial appointment of voters again and again -

Russia's options

Russia's IMF agreement last bles might finally be over. This week, these hopes were in tatters, along with Russia's financial markets. George Soros, in a letter published in this newspaper yesterday, said that it has no ce but to devalue and introduce a currency board. Has Rus-

sia really run out of options? The root of the crisis is a lack of confidence in the exchange rate and in government's ability to honour its debt. This is despite the support provided by the IMF deal, and despite the government's admirable actions to improve the budget balance.

The financial markets are being crushed. Short-term bond vields rocketed to over 200 per sterday, as liquidity in the interbank market dried up and Russia's banks scrambled to sell bonds to meet their liabilities. The central bank has been pouring its reserves into supporting the currency, prompting it yesterday to impose limits on banks' s of foreign currency, Yet a full-scale financial crisis is not as imminent as Mr Soros fears. With its reserves boosted by the IMF package, the Russian government can meet its debtservicing requirements until mid-

September or so, even assuming that it fails to issue any new debt. Both it and the west do therefore have some time to consider the next move. One option is devaluation. However it hardly needs saying that this would be extremely risky. With markets as turbulent as Russia's, there can be no such thing as a "controlled" devalua-

month raised hopes that its trou- few years, and could even end in the collapse of both the government and the reforms.

The urgent challenge is to restore confidence to financial markets. What the IMF must do to shift more of the money intended for supporting the roubudget. By making it easier for the government to roll over debt this should help restore the confidence now sadly lacking.
Yet this tactic is only a stop

gap. In the longer term, it is sential for the government to restructure its debt and strengthen the public finances. Total domestic government debt is not excessive, but its maturity structure, even after last month's restructuring package, is heavily The last restructuring deal involved converting domestic bonds into dollar-denominated securities. But it left the Russian dollar bond market saturated and unstable. A way needs to be found to lengthen the maturity of rouble-denominated bonds.

In addition to restructuring debt, the Russian government must continue to devote its efforts to implementing its fiscal reform programme. Provided it does so, the west should in turn provide the funds Russia needs both to meet its short term finan cing requirements and to stabicrisis has indeed turned out to be far more severe than was initially supposed, in large part because of events elsewhere. Yet so long as the government is purtion. Such a move would most suing a sensible reform programme, the west has no likely spark a panic reaction, sending the rouble into a tailspin alternative but to continue to This would risk all the govern- support it.

Car ramp

The British government's any colour they liked if it was black. In this case consumers can have what they like so long as it is not a "grey" (unofficial) import. These are much cheaper than nearly identical cars from authorised dealers

To ensure that imported cars conform to European safety standards, they must generally be Vehicle Type Approval scheme. This is the blanket approval used by wholesalers for bulk imports. Blowever, individual cars may be shipped into the UK under the Single Vehicle-Type Approval regulations (SVA) on payment of

an £165 inspection fee. This system was originally designed to ensure that one-off personal imports conformed to safety regulations. Accordingly, a limit of 50 cars in each model wa set. However, the SVA regulations have increasingly been used by independent traders to bring in cars of standard manufacture from south east Asia. Because of the high level of dealerships in the UK such imports can be sold at around two thirds of the "official" prices.

Clearly this price competition attitude to car buyers is about as is entirely beneficial to the conhigh handed as Henry Ford's - sumer and should have been weiwhen he said they could have comed by the government. For a time it seemed that Tir Cavin Strang, the former transport minister, would open up this trade by abolishing the numerical restrictions. But his resolve crumbled after lobbying from the industry, and in May be announced that

the quota would remain. Now the independent traders are challenging the decision in the courts. They deserve every success. For whatever the legal niceties turn out to be, the present quota on grey imports is blatantly anti-competitive. The price differential between British and other car markets is hard to justify and needs to be challenged

Yet the High Court is not the best place to achieve a policy change of this kind. The replace ment of Dr Strang by John Reed in the recent reshuffle gives the UK government a chance to think again. A sharp prod from the EU competition directorate could give it the political excuse to do so. The government says it is pro-business: it must show that prices maintained by official this does not mean giving in to any businessmen who wants to maintain a fence round his market.

ussia's moment of truth

Markets are collapsing and threatening to drag banks and the rouble down with them. But, says John Thornhill, default may prove a more palatable option than devaluation

Russian reserves

t was only three that Russia's beaming prime minister, Sergei Kirlyenko, declared "absolute rictory" as the International Monetary Fund approved the first part of a rescue package designed to han Russia from leepening crisis. Yesterday, Mr Kiriyenko was staring at the respect of absolute defeat.

The country's collapsing financial markets have already cut of the government's access to fresh finance, exacerbating its shortterm junding difficulties. This in turn is eating away at the central which fell \$1.4bn to \$17bn in the first week of August - and is threatening to destroy the coun-

try's banking system. In a letter to the Financial Times, George Soros, the world's meltdown in the had now reached a "terminal phase". Yesterday, his prophesy appeared self-fulfilling

The prices of Russian equities and bonds plummeted to nev lows this year. The stock market, which was suspended at one point, fell 15 per cent before recovering to close 6.5 per cent down. The word on every market participant's lips was that either the government would have to the rouble. Neither is a happy

"If you had to sum up the nood of investors in one word it would be despair," said one market trader. "Investors have completely lost faith in the government," echoed Moscow's Kommersant business newspa-

Yet there is still a sense of unreality about the crisis. Most Russians, who do not have mortgages, car loans or credit cards, ppear oblivious to the wild gyrations of financial markets and interest rates. Even though the financial system appears on the brink of collapse, top Russian officials - including Boris Yeltsin, the president, Sergei Dubinin, head of the central bank, and Anatoly Chubais, the chief debt negotiator - remain on

Even Mr Kiriyenko, who has made heroic efforts to grapple with his responsibilities since entering office in March, was refsituation yesterday, "What is belongs in the realms of psycho- on the banks," he says. logy," he said. "There are at presdeterioration in the situation.'

Objectively, Mr Kiriyenko may be right. Russian markets amear to have been the victim of negative investor sentiment about the Japanese yen, the recent slide on Wall Street, further falls in the international oil price and fears of a Chinese devaluation. Prices have moved wildly in extremely thin volumes after most big investors closed out their positions ahead of their holidays.

"My feeling is that markets in Rossia are over-reacting " says Nicholas Stern, chief economist at the European Bank for Reconstruction and Development_"I do not think the markets have learned anything new over the past three weeks and, in that sense, the price movements are

rather artificial." Yet, as has proved to be the case in several Asian countries. extreme market falls can quickly cause fundamental problems of is beginning to happen in Russia

markets threatens to undermine the banking sector. The central bank vesterday moved to increase liquidity in the sector as liquidity." he wrote.

banks were in severe trouble. Holger Mueller, banking analyst at Fleming UCB, the Moscow-based investment bank, says Russian banks have been caught in a liquidity squeeze as the value of their financial assets has plummeted. Creditors have started calling in their credit currency reserves, have brought lines and refusing to roll over

rumours abounded that even

hard currency loans. "The main risk now is that one of the big banks that has household savings may not be able to using to admit the gravity of the pay out on their deposits which would cause substantial damage happening on the markets to confidence and trigger a run

If retail depositors started with ent no financial grounds for a drawing their money from the hanks - estimated to he 95hn at the end of June - this would put enormous pressure on the government debt market as banks were forced to liquidate their Treasury bill portfolios. It could also endanger the stability of the rouble as the population switched into dollars.

Yet the central bank appears acutely aware of the dangers of keeping weak banks afloat. Many Rossian banks are run more like speculative hedge funds than conservative financial intermediaries and their collapse would do little harm to the broader economy. "The central bank is afraid of injecting too much liquidity into the banking system because it will just be used to buy dollars and further destabilise the rou-

ble," Mr Mueller says. In his letter to the FT, Mr Soros argued that the action needed to resolve the banking crisis was diametrically opposed their own. The danger is that this to the action the government had agreed with the IMF to solve its

budget crisis. "The IMF programme imposes tight monetary and fiscal policy; the banking crisis involves the injection of

Mr Soros argued the only way out of this dilemma was to introduce a currency board - backed by \$50bn of reserves - after a 15-25 per cent devaluation of the rouble. Such currency boards. which fix the local currency to a hard currency and ensure that domestic money supply expands or contracts in line with hard

'A devaluation would be a disaster. The market would end up chasing its own

financial stability to countries as diverse as Argentina Estonia and Singapore.

tail downwards'

But the Russian government has long argued it would be impractical to introduce a currency board in such a big and complex country. Besides, where would the \$50bn come from?

"For a currency board to work, you have to have a very flexible fiscal policy because you have no control over your monetary policy." says one western economist. But anyone who understands how fiscal policy works in Russia knows that that is not very realistic.'

A better way of letting some steam out of the system may be to have a controlled devaluation - to reflect the fall in commodity prices which form the bulk of Russia's exports - and introduce a more flexible exchange rate regime. But again the question is whether Russia has the

cient international reserves, to deliver such an outcome

GKO bond yield

Ministers fear any devaluation of the currency would panic the population leading to a run on the banks and a rout of the rouble. "A devaluation would be a disaster." the western economist said. "It would end up with the market chasing its own tail downwards.

Before it contemplates a devaluation, the government seems more likely to force a restructuring of the domestic treasury bill (GRO) market, which has been the chief cause of its financial woes this year. Politically, it is becoming increasingly hard for the government to persuade striking workers that it should honour its debts to foreigners in the debt markets before it pays off wages to coalminers and teach- ful structural reform. It is also

With foreign investors reluctant to roll over their holdings of Seven countries to plug the short-term GKOs, the thinking is expected hole in the governthat the government may force them to do so by unilaterally lengthening the bonds' maturities. "Russian debt is already trading at default levels," says selves to the fact that they are ber 1. David Lipton, the under-

going to get restructured." lightly. Any such drastic meaaccess to capital markets for many months to come. But so long as the government continued to run a budget surplus, it could soldler on regardless. That would win more time to overhaul its tax regime and put its public

finances in order. A growing part of the Russian industrial establishment appears to favour devaluation. They believe this would make their exports more competitive lower their domestic cost base. Russia's politically powerful oil and gas

institutional capability, and suffi- companies, which own large argue that a devaluation would be the best way out of their own financial difficulties. They have taken to dismissing the IMF as "Gosplan on the Potomac", referring to the Soviet command

Aug

Eurobond yield (%)

For the moment at least, the government appears determined to stick to its IMF-approved austerity plan. The Fund has given the central bank sufficient reserves to hold the rouble for several more weeks, perhaps months, assuming there is no mass mass papic among the pop

ulation. Ministers are still arguing that investor confidence will return strated its commitment to raising tax revenues and pursuing painpossible that more support may come from the IMF or Group of

ment's funding needs this year. The US administration, in perticular, appears desperate to help the Russian government through its financial crisis, especially one bond holder. Investors are since President Bill Clinton is beginning to reconcile them- due to visit Moscow on Septemsecretary of international affairs Such a step could not be taken at the US Treasury, yesterday held talks in Moscow with Mr sure would close off Russia's Kiriyenko to discuss the government's financial plight.

It is clear that the Russian one. ernment has no easy options. It remains highly vulnerable to global events and market moods beyond its control. Yet the outcome of the next few weeks could prove critical in determining the stability of the Russian economy and the political system for years to come.

It has become something of a cliché to argue that Russia is forever at a turning point. But this

OBSERVER

Moral debt deal Nearly two years of legal companies that have been taken wrangling and sanctions threats to court in the US for not paying have finally produced a deal out on policies on lives lost in the

between the two main Swiss banks and Jewish groups, backed by local politicians, in the US. UBS and Credit Suisse are to pay Holocaust survivors \$1.25bn in compensation for failing to return wartime deposits and. nore broadly for Switzerland's lole in laundering Nazi loot. Settlement of this dispute, which has severely strained rela-

tions between the US and Switzerland, should restore some calm to the wider historical re-exchapters of this century. The deal is a compromise. The \$1.25bn to be paid by the banks over three years looks much

nearer the \$1.500 that the Jewish groups were demanding than the \$600m the banks offered in June. But unlike that offer, it covers any claims arising out of the Volcker inquiry into the Swiss banks' dormant accounts. The deal also provides for the dropping of any claims against all other Swiss banks. The most important of these is the Swiss National Bank. There are still loose ends. The

deal does not cover the Swiss among 16 European insurance ton in future.

Holocaust. But there is a pros pect of a more amucable settle ment, brokered by insurance commissioners of individual US There remains the possibility that US litigants will use the

Swiss bank deal as a precedent to go after others. Deutsche and Dresiner banks of Germany are being sued for compensation in the US. But the case against them may be harder to prove, because it rests on their overall amination of one of the darkest role in laundering Nazi war loot. not on any specific dormant accounts of Holocaust victims. Other European wartime neutral countries which collaborated with the Nazis have financial institutions which appear neither as culpable, nor as tempting a target, as the Swiss. There are two broader lessons.

Switzerland undoubtedly feels threatened by the international reaction. The search for allies has revived Swiss interest in joining the European Union. For the US, the affair represents in some sense a victory. But the way in which it was achieved - sanction threats by individual US states insurance companies, which are stores up difficulties for Washing-

denied here last night any intention to devalue the peso. Rumours of devaluation circulated in business and banking circles when the Bank of the Republic withdrew from trading in the free market on Wednesday, but continued to quote exchange for imports and exports. The bank's withdrawal from the free market was described by the Minister as a "temporary measure" and was due, according to authoritative sources, to heavy demand for dollars from Argentina. Rumania Unfreezes Funds

Bucharest, August 13. in view of the country's improved currency position, Rumania's Finance Minister has decided to release certain of the funds blocked when Rumania's currency was reformed in August last year. The lei funds to be released are small savings bank deposits, money deposited by diplomatic missions, funds deposited by nationalised industries and those belonging to the State before nationalisation, and various savings, pensions and public and private credits.

FINANCIAL TIMES

FRIDAY AUGUST 14 1998

THE LEX COLUMN

Tokyo on the tightrope

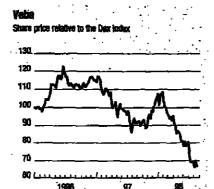

Recommending a "hairshirt" solution to someone else's problems is often tempting. The temptation is well-nigh irresistible in Japan's case, given the country's aversion to change and its underwhelming new group of political leaders. But Long Term Credit Bank of Japan is a salutary reminder of the dangers a radical shake-out could pose.

Voices in the market are baying for blood and have set on LTCB as the sacrificial lamb. But closing banks is no simple matter when you are simultaneously trying to resuscitate the economy. The closure last November of Hokkaido Takushoku devastated the regional economy. And LTCB presents an even more difficult challenge - it has extensive international exposures, much of it through derivatives. It is also large - some six times the size of Continental Illinois, deemed too big to fall by the US authorities in 1984. Satisfying market vigilantes might, therefore, have

serious systemic consequences. Doing nothing is not an option. That would trigger a spiral of economic and market gloom probably just as severe. Japan's authorities must tiptoe between these two extremes. Shareholders and ement have to take their punishment. But this must not be allowed to unleash damaging systemic consequences. This may mean throwing a temporary lifeline to the likes of LTCB.

Veha's business difficulties are only half the problem. The losses at its silicon wafers unit are disappointing, though hardly surprising, given the state of the semiconductor industry. More worrying is start-up costs well above expectations. But this is largely due to 120 new competitors scrabbling for share. Most of them will disappear as the market shakes out. Meanwhile, Veba has put together a valuable collection of telecoms assets, which could be sold if they do not perform.

The real disappointment is the group's failure to communicate the bad news properly. This has rightly angered investors who bought into Veba as a shareholder-friendly company that promised consistent double-digit growth. The result has been huge underperformance; the DM96 share price compares with

break-up values of DM150 and more. To regain trust, the management will have to keep restructuring and eventually disture. The example of rival Viag, whose shares have jumped over 20 per cent since it booted out its senior management in June, should provide plenty of motiva-

Cross-border M&A

Cross-border takeovers financed by stock, once considered impossible, are suddenly all the rage. British Petroleum Amoco and DaimlerChrysler, the two largest industrial mergers to date, are taking this approach. So have several smaller deals, such as Interpublic's purchase of Shandwick, the UK public relations out-

The attractions of using paper are obvious, since all-stock deals can be structured to avoid painful tax and goodwill charges - an advantage US companies have long enjoyed domestically. The sticking point has been a belief that shareholders do not want to hold foreign stock in a different currency.

As investors have become more global in outlook this is clearly no longer the case. Companies are also doing their best to make their paper palatable; BP is making much of the liquidity of its American Depositary Receipts and switching its reporting to dollars.

DaimlerChrysler is going one better with its new global registered shares. While these are hard to distinguish from

ADRs in practical terms, more US inves tors may qualify to hold them. They may even gain entry into the S&P 500 index. opening them up to index-tracking funds. And both groups are offering shareholders dividends in the currency of their

For now, all-share cross-border deals will probably remain confined to two types of deals: big mergers among house-hold names that institutions will have to participate in, or purchases of small companies by much larger ones, where any flowback of shares would matter little to the acquirer. But as investors become accustomed to holding foreign paper, the middle ground will open up - and so will

Parmalat

Tired of milking the cows? Try the shareholders. That appears to be the philosophy of Calisto Tanzi, the controlling shareholder of Italian dairy products group Parmalat. Mr Tanzi's acquisitive habits have seen turnover leap from L4,300bn in 1995 to an expected L10,000bn this year. But his appetite is far from sated, hence a planned \$600m capital raising exercise. But just how does a family capitalist grow fast while keeping

Answer: resort to the discredited mechanism of non-voting savings shares. Worse, Mr Tanzi reckons he can escape pricing these shares at the typical 35 per cent discount to normal shares. Becaus the savings shares are convertible in the event of a takeover, he hopes to get away with a 10 per cent discount. But this is spurious, since Mr Tanzi controls the company and is resorting to savings shares precisely in order to preserve this

Moreover, for the new stock to yield the 3 per cent that savings shares average, it would need to be priced at about L1,600, not the L3,000 which Mr Tanzi is targeting. But if the issue proceeded at the cheaper level, there would be huge earnings dilution. No wonder the shares have fallen 12 per cent since the issue was

The best thing for Italy would be if Mr Tanzi's efforts failed. The lesson that fast growth requires sharing the spoils clearly

Senior MP's defection hits S African National party

Decision by frustrated reformer is coup for United Democrats

The National party, which imposed apartheid on South Africa for four decades before yielding to majority rule in the 1990s, was dealt a severe, possibly fatal, blow yesterday when one of its senior figures defected to another party.

Sam de Beer, a former cabinet

in Gauteng - the country's most important province embracing both Johannesburg and Pretoria – joined the year-old United Democratic ment in a public signing ceremony and automatically lost his position as a member of parliament. Mr de Beer's choice of the UDM rather than the Democratic party is a coup for the new party, founded by Roelf Mever - like Mr de Beer a former NP reformist - and Bantu Holomisa. Mr Holomisa called Mr de

Many voters are disappointed by the African National Congress government's failure to reduce une ployment or boost economic growth. The multiracial UDM, in spite of the vagueness of its policies, appears to be emerging as the ANC's main challenger in next year's general election because other opposition parties are ninister, who was leader of the NP identified with particular racial or

ethnic groups.
"The contest will be between the ANC and the UDM," Mr Holomisa said. "We do qualify in terms of demographics to put up a strong fight against the ANC." The NP's dismal showing in recent

local elections suggests it is a spent force as a nationwide organisation and may survive only in the Western

Right-wing whites accuse the NP of betraying them by handing over Beer "a big fish" and Mr Meyer said he would be followed by a stream of

other deserters from the National party of oppression and racial segre-ists. party of oppression and racial segre-ists. resignation merely confirmed the NP's "reserved place on the rubbish dump of history". Mr de Beer said he had struggled

for three years to reform the NP, but

had eventually been forced to admit failure. "I joined the UDM today because this party reflects the feeling of how a South African party in these days should look and feel," he said. The political scene in South Africa has to be restructured. South Africa needs a dynamic new party that truly represents all the people." South Africa's old-fashioned Nationalists may be in terminal decline, but they are not leaving the stage without a fight. On Monday, a lengthy court case against the 82-

year-old P.W. Botha, former South African president and NP leader, for refusing to testify before the Truth and Reconciliation Commission power to the ANC, while most other investigating apartheid-era crimes is South Africans remember it as the due to resume in the town of George

Howard gambles on 'biggest tax,' reform in Australia's history'

PM's make-or-break move reflects rise of One Nation party

By Gwen Robinson in Camberra

John Howard, the Australian prime minister, yesterday staked the future of his conservative coalition on would determine whether Mr.

plans for sweeping tax reforms. The package, which Peter Costello, the treasurer, described as incorporating the "higgest tax changes in the history" of the country, includes the introduction of a 10 per cent goods and services tax to replace a nost of indirect taxes.

For the coalition, reeling in the face of the rapid rise of the populist One Nation party in rural and industrial areas, the announcement represents a make-or-break move.

The package involves personal income tax cuts of about A\$13bn (\$7.8hn) and provides benefits to lowincome families, farmers, miners and export-dependent industries all groups that have voiced dissatis faction with the government's poli-

Mr Howard said the government planned to implement the reforms in budget surpluses in the coming

July 2000, but only if his coalition was re-elected in forthcoming polls. Officials indicated that the public response to the promised reforms Howard called an early election, possibly in October, instead of serving

his full term to mid-1999. The announcement follows a string of political defeats for the prime minister, including parliament's recent rejection of his proposal to privatise the remainder of Telstra, the Australian telecommunications glant. More significantly, it follows a previous attempt by Mr Howard's Liberal party to sell a goods and services tax (GST) to vot- he said. ers. That proposal lost the party the

1993 election. Australia relies heavily on income tax as it is one of the few developed countries to lack any form of consumption tax. Critics warned of the impact of the reforms on Australia's fiscal position and on the government's projections for substantial

years. Mr Costello acknowledged yesterday the GST would cut the projected budget surplus in 2000 by about A\$4.8bn to A\$3.85bn. The tax reforms would increase annual consumer price inflation by nearly 2 percentage points from mid-2000, but it would be a "one-off effect" with no mplications for monetary policy, he

Mr Costello said the Reserve Bank of Australia, the country's central bank "realised" the GST would have only a one off impact on inflation. They will also understand that the reforms are worth having for all sorts of decent economic reasons,"

Nevertheless, some economists warned the central bank might undertake a pre-emptive monetary policy tightening to offset the effect of the changes.

Mr Costello also promised to maintain budget surpluses in spite of the erosion of the budget's bottom line in the coming years from the net impact of the tax changes.

Telecoms losses hit Veba profits

Silicon wafer problems halt German group's growth

Veba, Germany's fourth largest company, yesterday saw its entrangs track record thrown sharply into reverse as its push into telecommunications fell well short of expectations and Asia's economic crisis hit silicon water activities.

The diversified industrial conglomerate, which listed its shares in New York last Octo-ber, warned higher losses in belecoms and from its MEMC silicon water subsidiary would drive net profits this year "significantly below last year's DM2.8bn (\$1.56bn). First-half pre-tax earnings were up 14.7 by 9.1 per cent after adjust-ments for divestment gains and restructuring costs.

"After 17 quarters with double digit profits growth, we're the rivel Düsselderf-based conglometate, yesterday said profexperiencing a necessary consolidation phase, said Ulrich Hartmann, Veba chairman. Veha's telecoms losses its from its telecoms activities reflected the poor start by u.tel.o. its joint venture with RWE, the Essen-based industrial conglumerate, despite planned investment of DM7bn.

ised on January 1. Veba blamed strategy flaws and pointed to a new management team installed last month. Veha's half year telecoms losses were not disclosed but o.tel.o is expected by analysis to make total losses this year of about DM2bn.

In contrast, Mannesmann, stake in o.tel.o.

jumped DM184m to DM697m in the first half. Mannesmann's strength was based on its D2 mann Arcor, its fixed line business, started public services earlier than o.tel.o and from the outset placed no require-ment on customers to register before using its network. Veba said it remained committed to developing its tele-

coms business, building on o.tel.o's success in the business sector and by integrating

with BellSouth over a planned

Mr Hartmann said the MEMC business remained is also looking to sell sanitary "attractive", despite tumbling and beating activities. prices and losses of DM161m in the first half plus restructuring charges of DM250m. MEMC is be taken under direct control from Düsseldorf - rather than be absorbed into the new chemicals group being created by the merger of Vebs's chemicals activities with Frankfurt-

based Degussa. Veba sought to counter the impact of yesterday's announcement by revealing cost cutting messures would pany. Vebs is also expected to be stepped up, with annual Lux, Page 12

expected from 2002, compared with DM1hn. Meanwhile, restructuring at Stinnes, the distribution and logistics com-pany, could hit earnings in 1998, Vebs warned. The group

Yesterday's news tarnished Veba's image, with the shares ending down DM3.85 at DM95.75, having fallen to

DM92.6 at one point. "We need to see that all the action is having some effect before sentiment will turn in their favour and narrow the discount to the sum of the parts," said Martin Dixon-Ward, analyst at Flemings Securities in London.

Boeing set to move plants and cut costs

By Tracey Corriges in Hew York

Boeing, the struggling Seattle-based aerospace group. plans to open a 737 assembly line in Long Beach, California, and consolidate fighter aircraft production in St Louis, as part of its efforts to cut costs and improve efficiency.

"We are strategically aligning our operations in response to global business realities. We are reducing costs. The end result is that we are ensuring a stronger, more competitive company," said Phil Condit, Soeing chairman and chief

executive officer. Boeing previously said it would reduce its total work-force by 18,000 to 28,000 by the end of 1989.

. Analysts said the latest moves were seen as unlikely to halt speculation that Mr Condit was preparing to resign. Bueing has denied this and other rumours, including the replacement of Mr Condit by Boeing president Harry Stone cipher.

Among yesterday's changes the company said it was relo-cating the headquarters of the Information and Communications Systems business unit to Anabelm, California, from Kent, Washington, and vacating all government-owned space in Downey, California.

"These guys are six months

late," said one analyst. While management had taken action to cut costs, it bore responsibility for poor margins. "They should not have set those prices if they could not get the costs down. It has not been an appropriately run company."

Mr Condit took over as chief executive officer in April 1996 and has made two substantial acquisitions, but production problems tipped the company into losses.

The move of next-generation 737 production to Long Beach has been expected. The change will stretched plant in Renton. Washington.

The additional 737 li supplement canacity in Renton and allow more efficient and productive use of that key final assembly facility," Mr Condit said. "We will begin final assembly of the first Next-Generation 787 in Long

Memco's vice-president of business development. Memco's main product,

known as SeOS (Security for Open Systems) secures information on computer servers that lies "behind" firewalls, which protect networks from external intruders. For example, the system helps prevent internal corporate espionage and can keep high-ranking system administrators from using their access privileges to read other people's e-mail.

According to a recent report by Elan Zivotofsky. Israel technology analyst for Goldman Sachs, Memco faces "virtually no competition" for its technology and "has emerged as a global

leader" in its niche. Mr Zivotofsky estimated that Memco's earnings would grow at about 40-15 per cent a year. Memco's net income tripled from \$3m in 1996 to \$9m last year. Revenues doubled to \$30m over the same period.

Platinum will pay for the deal through an exchange of 0.836 shares of its common stock for each Memon share. This values Memco at \$28-a share, or about 19 per cent above yesterday's opening price of \$21%, Memco's shares were up to \$22 in early trading in New York.

But Platinum fell almost 10 per cent, as Wall Street fretted about the amount of stock being issued to fund the deal. By lunchtime, they were down \$3 at \$27%.

NORWAY

Aker RGI advances 47% at midway

Aker RGI, the Norwegian conglomerate controlled by entrepreneur Kjell inge Roekke, yesterday reported a 47 per cent rise in first-half profits following sharply increased contributions from shipbuilding and offshore engineering activities, and reduced losses in seafood production. The holding company, where Mr Roekke recently increased his stales from 40 per cent to more than 65 per cent, reported pre-tax profits up from NK/284m to NKr418m (\$55m) in the first six months of the year as sales increased from NKr12bn to NKr16bn.

Aker said the improvement had been fuelled mainly by Aker said the improvement risk been reality by growth in Aker Maritime, its majority-owned of and gas technology business, where operating profits rose from NKr96m to NKr415m, Scancem, the cement and building materials business, also contributed some NKr600m, up from NKr445m. "Aker Maritime shows solid growth in both revenues and profit, reporting higher profits in all business areas. Scencem also continues its positive development from 1997," the company said.

Profits in those areas offset losses in other areas such as Norway Seafoods, although it reported a sharply reduced deficit of NKr19m - compared with operating losses of NKr129m last time. In seafoods, the group was held back by pricing pressures and coeffer raw materials associated with Asia's economic crisis. The absence of restructuring costs and one-off items incurred in 1997 helped transform last year's first-half operating loss of NKr237m into a NKr473m profit. It did not release figures for earnings per share. Tim Burt, Stockholm

SWEDEN

Defence products aid Celsius

Celsius, the state-controlled Swedish defence group, yes terday reported sherply improved first half profits amid strong demand for its defence products and commercial aviation services. The perity-privatised company saw pre-tex profits increase to SKr269m (\$33m), up from SKr159m, on sales ahead from SKr5.22bn to SKr5.99bn, Lars Josefsson, chief executive, attributed the growth to Swedish military orders for new ammunition and weapons systems and increased maintenance activities on the civil aerospace side. That helped lift operating profits from SKr88m to SKr274m in the six months to June 30.

For the full-year, Mr Josefsson predicted net income of more than SKr500m, more than double the SKr207m achieved in 1997.

He also vowed to press ahead with the group's strategy of focusing on defence activities, with further co-operation deals with international competitors. In the past week, Celslus has signed a technology-sharing deal with France's state-run DCN shipyards covering conventional subma-rines, and a missile joint venture with Daimler-Benz Aero-space of Germany, in the first half, it underlined that stratagy by announcing plans to form a joint Nordic ammunition company with Patria Industries of Finland and Raufoss of Norway. In Stockholm, Celsius's most commonly traded B shares rose SKr1 to SKr181. Tim Burt

ENTERTAINMENT

Lévy in talks with EMI

Alain Lévy, former president of PolyGram, the Dutch entertainment group, is understood to have met with Sir Colin Southcate, chairman of EMI, the UK music group which is considering making a bid for PolyGram's film and television subsidiary. EMI declined to comment. However it is believed that the two men discussed the forthcoming sale of the film business when they met recently at EMI's London headquarters, but Sir Colin did not offer Mr Levy a formal role at the company if EMI was to acquire it.

As Europe's largest film producer and distributor, Poly-Gram Filmed Entertainment (PFE) has backed a string of box office hits. It was put up for sale following the \$10.4bn bid for PolyGram by Seagram, the Canadian entertainment group. Mr Lévy left PolyGram after the bid was agreed.

EMI, which held unsuccessful takeover talks with Seagram before the latter bid for PolyGram, is one of a dozen companies that made preliminary offers for PFE. It is now deciding whether to make a final bid by the mid-September deadline. EMI has previously pursued a strategy of focusing on its music interests, and Sir Colin would need to secure the agreement of his board, which is dominated by non-executive directors, before making a final offer. Tadiran ahead 28%

Tadiran, Israel's biggest electronics group, said yesterday net income in the first half climbed 28 per cent, as the company widened its client base to reduce dependency on big customers. Net income climbed from US\$29.6m, or \$1.51 a share, to \$37.7m, or \$1.91. This was in spite of only a slight rise, from \$570.5m to \$576.5m, in sales. Exports accounted for 57 per cent of sales. The results for Tadiran, a subsidiary of Koor Industries, Israel's biggest holding company, came as M. A. Industries, Koor's generic agrochemicals subsidiary, reported a 2 per cent rise in net income for the half. Net income at M. A. Industries climbed from \$29.6m last time to \$30.3m. Revenues were up 5 per cent, from \$355m to \$374m. M. A. industries is the merged company formed earlier this year which includes Makhteshim and Agan. Avi Machlis, Jerusalem

South Korean groups report mixed results

Samsung Electronics, the world's largest memory chipmaker, yesterday reported that first-half net earnings rose 22 per cent to Won150.1bn (\$113m) in spite of a fall in global prices for its main product. Sales climbed 18 per cent to Won10.530bn.

Analysts said \$amsung benefited from stronger sales of telecoms equipment, although its semiconductor and consumer electronics divisions were weak. Earnings from exports also boosted profits, owing to the weakness of the Korean currency against the dollar. Exports accounted for 70 per cent of sales in the first half.

LG Electronics, a leading manufacturer of consumer electronics, reported that net profits fell by 7.5 per cent to Won101.3bn, although sales were ahead 22 per cent to Won5,380bn. LG blamed the lower earnings on higher foreign debt payments because of currency depreciation and weak demand in the domestic market, with a 28 per cent fall in sales to Won1,380bn. However, exports jumped 61 per cent to Won4,000bn, as a result of the weak currency. ber cent to work, broom, as a result of the weak current.

Interim net profits at Daewoo Heavy Industries, the South Korean shipbuilding and heavy machinery group. rose from Won37.7bn in the first half last year to Won102.1bn this time. The company said foreign-ox-change translation gains and a strong performance in the shipbuilding sector contributed to the increase. Sales rose 12 per cent to Won3,190bn.

GOLF PRODUCTS ASSET RULE NOT MET

Golden Bear to be delisted from Nasdaq

By John Labati In New York

Golden Bear Golf, the golf products company whose chairman and leading shareholder is golf legend Jack Nicklaus, said yesterday that Nasdaq is delisting the company on August 18. Nasdaq would not confirm the state

Golden Bear, Which is based in West Palm Beach. Florida, said the move to delist its securities was based on Nasdaq's net tangi-

ble asset requirement. The exchange requires companies trading in its market to maintain \$4m in net tangible assets. Golden Bear confirmed its holdings in this area were below the \$4m requirement.

The decision to delist comes one day after a class action lawsuit was launched against Golden Bear.

The complaint, alleging the company issued false and misleading financial statements, was filed on behalf of investors who purchased its shares between April 10 1997 and July 27 1998, when they were suspended from trading on

The company has previously stated that evidence

agon Construction subsidiary had materially overand profits. Paragon, a golf course construction company, was believed to account for 60 per cent of Golden Bear's revenues.

Golden Bear plans to restate its financial reports for 1997 and the second quarter of 1998, but did not say when those documents would be reles

NLG 500,000,000 Floating Rate Bonds 1992 due May 15, 2002

in accordance with the Terms and

Conditions of the Bonds, notice is hereby given that for the Interest Period from August 17, 1998 to mber 16, 1998, the Interest Rate has been fixed at 2.84%. On November 16, 1998, the following amounts will be payable on NLG 10,000: NLG NLG 100,000: NLG 717.89 NLG 1,000,000: NLG 7,178.89

Sales for the second quarter 1998

interest expense."

The consolidated net sales for the second quarter of 1998 amounted to FRF 19.5 billion compared to FRF 20.1 billion for the second quarter of 1997. The increase on a comparable basis is 3.9%.

····			
in FRF railfors	2nd quarter 1997	2nd quarter 1998	Change on a comparable basis
Flat Carbon Steels	10,025	10,756	+ 5.8%
Stainless Steels and Alloys	4,571	4,165	-3.9%
Specialty Steels	3,789	5,032	+9.5%
Other Activities	2,462		· -
Inter-company sales	<u> </u>	-476	· ·
Usinor	20,126	19.477	1 3 9%

Figures for "Other Activities" are no longer available due to the deconsolidation of Vallourec on June 30, 1997 and the change of consolidation of Forcest on December 31, 1997 to the equity method. Theirox (Theiland, Stainless Steel and Alioys) and La Magona (Italia, Flat Carbon Steels) will be consolidated by global integration on June 30, 1998 and are not included in the above figures for the second quarter of 1998.

The increase in net sales for the Flat Carbon Steels and Specialty Steels between the second quarter of 1997 and the second quarter of 1998 is due to both an increase in demand in terms of volumes (Flat Carbon Steeks + 0.6% and Specialty Steels: + 5.5%) and an increase in average sales prices (Flat Carbon Steels: + 5.2% and Specialty Steels: + 4.0%). The decrease in net sales for the Stainless Steels and Alloys

results from an increase in volumes (+ 1.3%) and a decrease in average sales prices (- 5.2%). The Group continues to benefit from a favourable European economic environment in a context where the Asian crisis

starts to affect the price levels of certain commodity products.

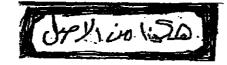

The consolidated net sales for the second quarter of 1998 amounted to

FRF 19.5 billion. 3.9% increase

on a comparable

basis.

COMMENT

Investment Trusts

Signs of positive action from the investment trust industry to improve its image are coming thick and fast. With Foreign & Colonial, the biggest, now planning to buy back shares, that swelling stream - already about one in six of the 300 trusts - should become a torrent. It is clearly better for investment trusts to initiate shareholder friendly action than to be forced into it by predatory stake builders, which have usefully shaken the sector's complacency. Buybacks will bolster net asset values per share, and should help narrow the substantial discounts to NAV at which many are trading. To case the way for large buyhacks, the government should remove technical barriers that mean trust status may be iconardised.

Buybacks will join moves to wind up some trusts in tackling the oversupply of equity. This dates back to a splurge of issues in 1993 94, since exacerbated by the partial withdrawal of institutional investors as they brought more specialist fund management in-house.

But investment trusts also need to stimulate demand. Daniel Godfrey, new head of the Association of Investment Trust Companies, is right to suggest a levy to spend on marketing to private investors. Adding a tenth of a percentage point to trusts' very low charges could raise 255m. similar to the amount spent marketing Peps. If it helped narrow the discount by just one percentage point, the return would easily justify the cost.

Danka Business Systems

The rise and fall of Danka has a depressingly familiar Danks Bu ring to it. Stunning curnings growth for over five years, fuelled by acquisitions. Then the deal too far, buying Eastman Kodak's photocopying business which doubled its size. The bungled integration should make investors weep. First Danka wanted to keep the business separate. Then it decided to integrate it. The highly-charged salesmen had other ideas. A new compensation plan - poorly communicated - meant they had to cold-call more new customers. It made them hang up

the phone instead. Total equipment sales fell 22 per cent in the first quarter and more heavily in the US. Alarmingly, interest cover is now less than two times. It is hard to see how the current management can restore credibility from

Riches for the few

Directors' pay seems to be rising irrespective of company performance

Pay restraint is a difficult concept to promote when you have your own snout firmly in the trough, a trade union leader said last week. John Edmonds, the GMB union's general secretary, was reacting to a report Which found that directors' pay in the UK's 350 largest public companies had risen by nearly 18 per cent in the last financial year.*

The report showed that not only had many directors enriched themselves with large bonuses and the cashing in of share option schemes, but some, where annual bonuses either went down or failed to pay out, compensated by large, basic salary increases.

This rise in pay appears to explode the myth that directors can expect big pay increases only when they improve the company's performance.

In the US, where chief executive payouts in top companies have hit the stratosphere, there have been examples of boardro generosity to

underperforming executives. Lester Alberthal, 54-year-old chairman and chief executive of Electronic Data Systems who has just announced his departure, did not qualify for a bonus or stock options last year but was, nevertheless, given £13m in restricted shares.

There is an argument. voiced by the UK's institute of Directors, that directors of big companies deserve their rises because they are controlling enterprises which create the nation's wealth. "You are talking about the star performers of the FTSE. To put it in context, the vast majority of directors have been getting annual pay increases of between 3.5 per cent and 4 per cent," says Tim Melville-Ross, directorgeneral of the loD.

But now that the stable directors of hypocrisy but economic conditions that the directors might argue that they do not set their businesses craved for so long have been achieved, is it own pay. Their pay is settled really sensible for those who by remuneration committees which tend to rely on pay run companies to allow their own pay awards to race ahead of those of their consultants. The consu use data and various employees? formulas to determine pay.

often in relation to the "size and complexity" of the business. This phrase usually means that if a company acquires another company the boss gets a boost in pay to reflect his standing at the head of a much bigger company. On that basis we might

expect a company which sells off less profitable companies to cut the pay of its chief executive who would now be heading a smaller company. It doesn't

Pay became less of an issue.

One solution might be either to throw out the consultants or to engage their methods to determine the pay of every employee in the company.

Another solution requires

something more than consultancy – nothing less than a change in values. It is long-term, fundamental and somewhat idealistic. Charles Handy, in his last book, reminded business leaders of their wider role in a society dominated by capitalism. It is something Peter Drucker recognised more than 40 years ago. In *The* Practice of Management, he wrote: "Their (managers') impact on the economy will be so far reaching that society will hold the manager accountable. Indeed, the new tasks demand that the manager of

is the pay scramble on either side of the Atlantic +44 171 250 3484 living up to these ideals?

There was one example of clear managerial pay restraint in the annual reports of FTSE 350 companies - that of Body Shop. Anita and Gordon Roddick, joint chairmen, each drew total earnings of £162,000 in 1997, reflecting pay increases of 3.7 per cent. Their remuneration committee had recommended salaries of 2300,000 each. Each earned

City bonuses Monks Partnership, the pay consultant which supplied the information for the table published above, is predicting a fall in bonus payouts in City of London dealing rooms next year as : result of the economic downturn in Asia.* Bonus in all. The median level of

levels for 1998 were higher in some areas but by no means bonus in global custody departments fell from 20 per cent of salary in 1997 to 10 per cent this year. The only traders to get bonuses topping 100 per cent

market derivatives, rising from 75 per cent of salary the previous year. Other big bonus payouts were enjoyed by those in asset finance (45.3 per cent), structured finance (50.6 per cent), bond sales and syndications (43.7 per cent), bond swaps (56.3 per cent), securitisation (43.3

per cent) and stock lending (41.3 per cent). Bonuses in front office management went up by about 4 per cent while those in clerical and supervisory positions saw their bonus levels rise by 2 per cent. The table is drawn from the Monks Partnership Cuide to International Banks and Innestment Houses, which covers about 400 jobs among The report is \$310. Contact Montes Partnership, tel +44

Training counts

Another report released this week suggests throwing money at people may not be the best way to attract them.*

Salaries of UK-based information technology employees are expected to rise by 10.5 per cent in 1998/ 99, according to research undertaken by Reed Computing Personnel and published in IT Employment, a report from Manage Today magazine and Market Fracking International.

Pay bills are rising faster than expected in response to increasing staff turnover. running at 19 per cent on average throughout the UK and at 38 per cent in the City of London:

But research among IT employees suggests that they have other imperatives such as training, work on "cutting edge" projects and flexible hours. The study found that IT employees were more likely to change jobs for better career prospects than for pay. Some companies are beginning to get the message. On the job Training was provided by 31 per cent of the 173 employers surveyed and further 15 per cent were planning to introduce training.

*IT Employment is published in two volumes, £495 each. Contact Stephen Cassidy, tel +44 171 263 1365

BANKING FINANCE & GENERAL APPOINTMENTS

EUROPEAN CENTRAL BANK

VACANCIES IN THE EUROPEAN CENTRAL BANK

The European Central Bank (ECB), established in Frankfurt am Main on 1 June 1998, is urgently seeking applications from suitably qualified candidates to fill vacancies in its Directorate for External Relations and its Directorate General for Payment Systems. The ECB has its own terms and conditions of employment, including a competitive salary structure, retirement plan, health insurance and relocation benefits. Candidates must be a national of a Member State of the European Union

Positions and Qualifications

Press Officers

The holders of this position will work in a team assisting the Head of the Press Division in the performance of her duties, in particular.

- elaborating responses to the media and to the public in general regarding the ECB and European monetary
- organising press conferences and newspaper, television and radio interviews; - drafting of contributions to the press;
- evaluating press reports on issues of relevance to the ECB and compiling a daily press digest for the use of the Management of the ECB.

- Candidates should have a university degree in economics or business administration.
- A very good command of English and proven drafting ability in English are required. Italian, French or Scandinavian language as the candidate's mother tongue is desirable but a working knowledge of at least one other European Union language is required.
- The ability to work under time pressure and to tight deadlines.
- Familiarity with modern office equipment and personal computers.
- · A sound knowledge of central banking and institutional features of the Community would be an advan-
- Experience of contact with the media is desirable.

Ref: ECB/12/98FT

Administrator - TARGET and Payment Processing

The ECB has two roles in TARGET. One is as a participant in TARGET via its Payment System making euro payments on behalf of the ECB and its customers. The other is as a co-ordinator of certain functions in TARGET as a whole and in particular in the End-of-Day application.

We are looking for a real-time payments systems professional to act as team leader of one of our small operations teams. The person will be in charge of day-to-day operations in a high profile environment. Therefore only applications from persons with proven experience in high-value payments processing and an understanding of the issues raised by the creation of the unique euro money market can be considered. He/she will participate in a wide variety of tasks relating to the co-ordination of TARGET operations and the development of the system as part of the challenging opportunity to participate in an activity which will shape the payment systems of tomorrow.

Qualifications

- University degree in business management or information systems, or equivalent experience. . The candidate should have a proven track record in decision-making related to processing large value payment systems, and a good knowledge of TARGET. A good understanding of the technical environment and business issues underlying payment systems, including S.W.I.F.T. is a prerequisite.
- Good analytical skills with the ability for defining and using PC tools in reports to assist Management in high level decision making.
- Team leader used to working in an international environment, able to deputise for similar levels of responsibility in related areas, readiness to undertake shift work.
- Very good command of English and proven drafting ability in English. Working knowledge of at least one other European Union language is required.

Ref: ECB/13/98FT

<u>Applications</u>

Applications should include a Curriculum Vitae and a recent photograph, together with references confirming the required experience and skills. They should quote the appropriate reference number and should be addressed to the European Central Bank, Directorate Personnel, Postfach 16 03 19, D-60066 Frankfurt am Main, and should reach us no later than 28th August 1998. Applications will be treated in the strictest confidence and will

Dresdner Kleinwort Benson

Quantitative Analyst

Dresdner Kleinwort Benson is a leading European Investment bank with world-class expertise, a truty global focus and a resultant enviable reputation.

This challenging role within an existing department covering a broad range of products in equities, fixed income, commodities and FX (in both traditional and emerging markets) will appeal to high calibre canditates with at least 16 months' risk modelling experience gained within an investment bank or consultancy background. The diverse range of responsibilities in product research, development of new (and refining of existing) risk and pricing models as well as the provision of general consultancy advice on risk methodologies worldwide calls for a flexible, hands-on approach.

Ideal candidates will have a Ph.D in Mathematics, proficiency in VaR methodologies and first-class knowledge of C/C++, Visual Basic and Interest rate and term structure models. Mathematical skills alone will not be sufficient; we will also be looking for excellent communication and interpersonal skills, creativity and a high level of energy.

The salary/benefits package has been geared to attract the best.

Please contact our retained consultant Karin Klern on 0171 929 2383. Alternatively send her your CV at Exchange Consulting Group, 13 St. Swithin's Lane, London EC4N 8AL. Fax 0171 929 2805. Any CVs sent directly to Dresdner Kleinwort Benson will be forwarded to Exchange Consulting Group.

You will be completely self motivated, hardworking and seek success at the top of your profession, investment banking and software sectors globally.

You will be a qualified accountant, preferably with an MSA, with a couple of years expenence in one of the big accounting An excellent communicator, you will have a strong interest in IT and a desire to work for an organisation at the leading edge of technology

If you believe you passess the drive, commutment and experience to succeed, you will be offered the salary, training and challenges required to truly make a difference on a global scale

Please apply in writing, enclosing your full CV, to TMP Worldwide, 32 Aybrook Street, London W1M 3JL quoting reference number 5093.

The Virgin Entertainment Group, comprising the megastore, cinema and related businesses worldwide, is one of the fastest growing areas within

With existing businesses throughout Europe, USA and Japan, the group has embarked upon an aggressive investment programme, including the recent purchase of Virgin Our Price from W H Smith, thus establishing the Virgin brand in a number of sectors within the global entertainment industry.

Virgin's search for excellence is now being extended to create an enhanced Group finance function to steer the Entertainment group through continued expansion and potential flotation.

Salary packages for all of these roles will be aimed at high achievers....

Group Financial Controller

West London

Continuing growth and re-alignment of the various business units within the organisation has created the need to recruit an experienced and highly commorcial individual to assume ownership of the Group Finance function. Reporting to the Group Finance Director, this role will include The creation of the reporting processes to manage the transition from a private to

- public entity. Control of internal and external reporting, including all aspects of business planning
- Providing support, direction and advice throughout the business
- Extensive involvement in the process leading up to flotation. · Limited travel to the US, Europe and Japan.

You will be a qualified accountant, probably between the age of 30 to 35 with experience of handling a highly professional and capable team, preferably within the retail industry. In addition you will have a strong intellect, a high level of energy and must demonstrate flexibility and excellent communication skills.

Corporate Finance Manager

The Virgin culture is based upon initiative and the ability to seize upon business opportunities as they present themselves. This scenario necessitates the Virgin Entertainment Group to recruit a dedicated individual to concentrate on the issues surrounding constant deal brokening. Reporting to the Group Finance Director and with significant input to the Group Chief Executive, key responsibilities will include:

- Refinancing and corporate restructuring.
- Ad hoc projects. Control of investor relationships and negotiations relating to existing banking

The successful candidate will be a qualified accountant, probably aged in their early 30's with significant exposure to corporate finance; gained within either commerce, significant presence will be key to success in this role.

Group Planning Manager

West London

Following expansion there is now an increased requirement to strengthen the Group Finance function to enable tighter controls and enhanced business planning practices throughout the business worldwide. This new role will involve the following.

 Design and implement the planning and forecasting process. Coordinate the relationships between the Financial Controllers of the individual business units.

Control all aspects of group management reporting.

You will be a qualified accountant, with 2 to 3 years post qualification experience. To date you will have gained sound commercial finance experience ideally within a retail environment, although this is not essential. Specifically you must have the ability to grow

interested candidates should in the first instance write to Richard Wright or David Sayers at Martin Ward Anderson, 7 Savey Court, Strand, London, WC2R OEL, enclosing their Curriculum Vitae with current salary details quoting the appropriate

T'S ALREADY THE BEST INFRASTRUCTURE IN EUROPE

London

Packages: £60,000 - £160,000

Every so often an IT environment is so remarkable that it is recognised as the benchmark for all others. Our new dealing infrastructure in London is acknowledged as the best in Europe. and probably the world. As an investment bank we are accustomed to being at the forefront, innovating at the cutting edge of global capital markets.

We realise that we can only continue to innovate using the very best technology which can deliver an infrastructure capable of supporting and developing our business strategy. The real global currency we trade is immediate and accurate information: if it's not complete it's valueless, if it's not immediate it's history, and if it's not accurate it can be dangerous.

HELP MAKE IT THE BEST IN THE WORLD

We know that an excellent infrastructure is the key to our success. We believe that there is no real distinction between infrastructure. architecture and development - they are all interdependent and are all needed equally to make business work. That's why we are now looking for the world's best infrastructure specialists to help us get maximum benefit from our new environment. We have opportunities in areas such as networking, database design and administration, systems administration and development, desktop and server support, and web engineering and support.

For further information, contact our advising consultants Karen Higgins or Winnie Wong, quoting reference KHFT120 on 0171 806 1420, Alternatively, send your CV to McGregor Boyall Associates, 114 Middlesex Street, London E1 7JH. Fax: 0171 247 7475. Email: cfinch@mcgregor-boyall.com or visit our web-site at www.mcgregor-boyall.com

Previous financial markets experience is not essential - you may be working in technology, in industry, or finance. What is important is that you have the vision and ambition to use your solid infrastructure experience as the launchpad for a career which crosses a range of technical disciplines. If this aligns with your goals and you have a team oriented approach, you should be talking to us. Better stril, come and look at our infrastructure; you'll see that we intend to be the best in the world.

Could you help us to achieve our goal?

Business Analysts Investment Banking

CITY

To £55,000 + Banking Benefits

The leading European Investment Bank is currently searching for dedicated Business Analysts to work across a broad base of business areas within Financial Control (P&L Production). Candidates will be working closely with the production, reporting and analysis of P&L information provided to the area. Projects are essentially global and currently providing P&L reporting and analysis functionality for the Equity and Equity Derivatives product lines.

Key strategic aspects of these positions include: global systems, structured as well as OO analysis techniques and technologies including Sybase, Delphi, Business Objects, and P&L solution.

Critically, successful candidates will be directly responsible for interacting with senior business users in the tasks of defining and delivering single global P&L solution for multiple product lines. Therefore candidates should be from a true analysis background and able to assimilate and gravitate between teams on a business level. Prospective candidates should have solid business analysis experience and a keen desire to gain a thorough understanding of the tasks at hand and further their knowledge of the business of investment banking.

Ideally candidates would have a knowledge of Investment Banking processes from trading and settlement to G/L accounting and P&L reporting.

Candidates would currently be working for an investment bank, securities house or a major management consultancy with first class interpersonal skills and a need to achieve.

These positions are viewed as high profile roles within Financial Control and offer attractive remuneration packages including competitive banking benefits.

replace UK gilt contract

By Jeremy Grant

Matif the French derivatives exchange, yesterday said it would launch a new version of a gilt futures contract it recently suspended after only nine days of trading. The first contract was

introduced on Matif's new electronic trading system in mid-July as a challenge to the London International Financial Futures Exchange ott-traded gilt-future. However, it ran into prob-

lems after complaints from traders over contract specifications and after a trade was badly mis-priced on the first day of dealing. Traders said at the time

the maturity of the contract was too short to allow them sufficient hedging opportuni ties. Nor were its specifications suitable to allow smooth arbitrage with the gilt future traded on Liffe. Matif said the relaunched gilt future would start trading on August 21. It had extended the maturity of the underlying securities from

7.5-11 years to 8.65-13 years. The new contract has the same characteristics as the long-dated gilt traded on the open-outcry system at Liffe: The gilt future is as part of Matif's strategy of attracting participants to its electronic trading system, which was introduced in April. It claims the system, known as NSC-VF, offers cheaper trading costs than the traditional, pit-based method.

Matif is battling rival European derivatives exchanges for dominance of contracts related to the eventual euro currency. It is marelectronic platform for yield convergence plays in the

Expansion depends on costly expenditure on new finds, writes Edward Alden

much needed windfall this year - rising prices for Canadian natural gas. But it is an cannot truly exploit.

opportunity most of them Spot prices for West Texas intermediate crude oil this week flirted with US\$13 a barrel, down from more than \$24 just a year ago. But Canadian natural gas spot prices, while volatile, are up about 20 per cent over a year ago to nearly C\$2 (US\$1.32) per thousand cubic feet.

Stronger gas prices have been driven by rising US demand and by anticipation of the completion later this year of pipelines that will allow Canadian producers to get more gas into the US market more cheaply. The expansion of the

Suppliers say part of the Northern Border and Foothills pipelines from western problem stems from the bunching of big annual gas Canada to the US Midwest contracts with an October 1 will add about 15 per cent to expiry date. The date is a current export capacity of carry-over from the British about 8bn cu ft a day. The separate Alliance pipeline Gas monopoly, which started will add another 1.3bn cu ft its "gas year" on October 1. Some suppliers have of capacity by 2000 along a advised corporate customers to drop the traditional buy-That is expected to elimi-

nate the historical differen-

GRAINS AND OIL SEEDS

With oil prices at spot gas prices and higher 10-year lows, Cana- US prices by allowing producers to deliver more gas ducers have been handed a directly into the US market. This will be a boon to the Canadian gas industry. which exports about 55 per cent of production.

The gap had already shrunk to about 75 Canadian cents per thousand cubic feet last month from the traditional C\$1 to C\$2 differential. A cold winter this year is also expected to tighten. supply and raise prices.

For western Canadian producers, strong gas prices are the only thing preventing a Toronto. bad year from becoming catastrophic. Weak oil prices robbing companie funds mean Canadian oil and gas company profits will fall 78 to a forecast by FirstEnergy most promising des are Capital, the Calgary broker. in deep pools in A and British Columbia.

"The industry's overall position would be a lot worse if gas prices weren't stable," says Robert Plexman, oil and gas analyst at broker CIBC Wood Gundy. The problem is that few producers are well positioned to take advantage of rising gas prices.

With very few unexploited gas reserves, expanded production depends on new finds, which means costly tial between lower Alberta expenditures on drilling. TSE's 14 industry grou-

SOFTS

The opportunities are are at best weig equally there, however, for gasbetween oil args, with weighted producers, such as many tilting irds oil, Alberta Energy, Rio Alto says John Clarkalyst at Exploration and Poco Petro-Deutsche Morgannfell in weighted to gas, had record The weak oil I means cash-flow of C\$166m in the cash-flows are doharply,

first half of 1998. Of the large integrated oil and gas companies, Shell has the largest gas weighting at 45 per cent of its overall production, followed by Petro-Canada at 42 per cent, and Suncor and Imperial Oil with just 19 per cent and 14

per cent respectively. Most of the companies that are oil producers are staying the course and gas producers are salivating at the opportunities," says Robert Gillen, an analyst with

the pipelines neared, Talisman shifted its C\$400m annual drilling programme leums. Poco, 76 per cent from 60 per cent oil and 40 per cent gas in 1997 to the reverse this year.

That paid off with two gas discoveries in Alberta this month. The company expects daily gas production 1997 to 620m cu ft this year. However, these successes have not been enough to offset losses from low oil

Second-quarter net income dropped from C\$5m to C\$1.9m, as Talisman's realised oil prices fell 27 per cent from a year earlier.

Still, in the current bear market for oil, increased gas production for the US market seems like the nearest thing to a sure winner left in the Canadian oil patch.

JOTTER PAD

Grasberg declares force majeure

MARKETS REPORT . By Kanneth Gooding

Grasberg in Indonesia, the world's biggest copper and gold mine, declared force majeure yesterday because of the strike that started on Tuesday. Freeport McMoRan Copper & Gold, which owns the mine, insisted it was meeting sales commitments from stockpiles.

Traders said copper on the London Metal Exchange was not affected by Grasberg's problems, but rose on the stronger yan. Copper for three-month delivery closed up \$8 a tonne at \$1,628.

Analysts remain divided about the 1998 copper market balance, with predictions ranging from "a small deficit of supply", by Asarco, the US producer, to surpluses of up to 350,000 tonnes forecast by consultancies such as Metal Bulletin Research, CRU International and Brook Hunt. They will all be watching LME stocks levels

Bloomsbury Minerals Economics, the specialist consultancy, in its Copper Briefing Service suggests this year's copper market surplus

will be about 115,000 tonnes. Peter Hollands of Bloomsbury says this rate of surplus would require LME stay at that rate throughout September.

"A slower rate would mean that our predicted surplus would need to be reduced or eliminated. A sustained higher rate would require it to be raised," he

Bloomsbury is forecasting that three-month copper will average US\$1.695 a tonne this year, nearly 24 per cent below the 1997 average, but will rise slightly to average

Mr Semple's optimism was borne out by the underlying Dealers said there was

Yesterday, the mood at very little genuine selling, had been buys.
"Share prices might be

> speak to the big institutions they say it is very quiet," said the head of sales at one "I was around in 1987 and

orders," he said.

However, the argument was not backed by the headline performance of the leading indices.

The Footsie future, which has an estimated fair value calculated at about 30 points above the prevailing level of the FTSE 100, was trading 90 points below the cash market just before it

The heavy fall was a response to comments by George Soros, the billionaire financier, about the state of

Footsie was off 112 points on very little volume shortly after the start of trading and spent the rest of the session trying to recover.

it was hampered domestically by heavy selling of the of the smaller companies are midcap stocks which now a steel to foreign buy-ensured the FTSE 250 index ers, said one dealer. ended the day 59.7 lower at

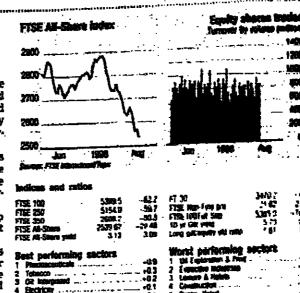

At that level it is 8 per cent above its close on the last day of 1997, while Footits year-end close. Dealers said that, while selling pressure on the Foot-

bly wrong". Back then, strategist Bob Semple argued: Bank of England "instantly completely different. Then for the day. sie has faded, it was intersected in the midday index and had driven the price of selected stocks to a level where they appeared very cheap to overseas predators.

> Every institution wants to sell the midcap and some

Eisewhere, the SmallCap index ended 26.6 down at

Overall turnover was 845,4m although turnover was boosted by heavy trade for the third day in BP and Shell, which accounted for 100m shares.

### **Fairey** up on bid rumours

COMPANIES REPORT By Martin Brice and Joel Kibazo

Rumours that Siebe was lining up a bid for Fairey surfaced in the last hour of trading and prompted heavy dealing as traders scrambled for stock.

Although some dealers dismissed the speculation. there was active business on the back of the story - just a handful of shares had been traded until late in the day. Much of the 1.3m Fairey shares dealt changed hands in the last hour, and the stock closed up almost 20 per cent. or 55 at 339p.

Shares in both companies have come under pressure as investors have deserted engineers exposed to Asian troubles and sterling strength in favour of more defensive stocks.

Fairey reached 590p earlier this year before it warned in March that its instrumentation side was experiencing difficulties. Siebe, which yesterday fell 41 to 962p, had reached £15.35 before highlighting Asian troubles.

If there is truth in the story, it would be the second approach to an engineering company that has prompted a market reaction in the past week. Charter was up 121/2 at 583p after rebuffing an

approach for its specialised Vaux disposal of its Swallow hotels chain, while Enter-BTR gained 1% to 157%p prise Inns said in June it would be interested in buying the tenanted pub estate US buy-out group, had plans to take a stake in the comof Vaux. Yesterday Vaux said it was "not in any discussions which may lead to

ulation suggesting it was in group's assets". merger talks or discussions that could lead to a disposal. The shares have performed strongly recently, boosted initially by rumours 21/2 to 4321/2p. Stakis eased 1/2 of a bid for Vaux with Whitto 104% and Enterprise Inns bread or Greenalls cited hardened to 3051/ap. among the possible preda-

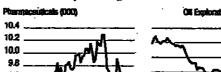

Brewing and hotels coman offer for the company or pany Vaux Group tumbled after it quashed recent specwhich relate to any of the The shares responded by surrendering 41 or 114 per cent to 318%p. Those of Whitbread fell 17 to 821p, while Greenalls Group eased

FTSE 100. The shares rose 35 or nearly 7 per cent to 536p after Goldman Sachs, the US investment bank, upgraded the stock from "market performer" to "market outperformer" following the recent fall in the share price. Goldman set a near-term share price target of 572p.

Standard Chartered fell 33½ to 573½p, while Bank of Scotland eased 21½ to 594½p. Barclays fell 63 to £15.57.

BSkyB was among a handful of Footsie constituents that resisted the downward trend as the market appreciated the group's aggressive marketing plans for the launch of its digital service in the autumn. The shares gained a further 18 to 446p, in trade of 6.4m.

SG Securities advised clients to "buy" the stock while Lehman Brothers rates them "outperform". Chassis maker Dennis con-

tinued to lose premium to the 450p offer from engineering group Mayflower. The shares have stood strongly above the bid price since Volvo of Sweden stepped in and supported the attempt by Henlys to merge with

The Henlys extraordinary meeting is scheduled for Monday for shareholders to agree the merger, and there may be a statement from the company then on how it plans to take the bid forward. Dennis shares were off 2 at 461%p, while Mayflower firmed to 177p. Henlys was

the stock rose 8p following passenger figures that showed a 9.2 per cent rise year-on-year. However, they lost their shine in later dealings, and closed down 514 at Dealers said Panmure Gor-634½p.

Sema gained 20 to 610p. following the announcement that Mercury Asset Management had acquired an 11 per cent stake in the company. WPP was up 6% at 386%p ahead of results on Monday

#### Tesco tumbles

per cent.

Supermarket group Tesco continued Wednesday's slide as a series of analysts' meetings with the company raised further fears of profit downgrades.

On Wednesday, joint brokers BT Alex Brown and in June that interim figures Morgan Stanley Dean Witter would be lower than the cut current year profit esti- same period the time before, mates by 2 per cent and by 4 unveiled a 62 per cent profit per cent for next year. The fall and said the full-year

ing their previous recommendations on the stock. Morgan Stanley rates it "outperform" while BT Alex Brown is a buyer of the

in the rest of the sector, J. Sainsbury eased a penny to 504p, while Safeway fell 614 to 32814p. Asda Group eased 1% to 188%p.

Danka Business Systems fell heavily as the office equipment group said the difficulties experienced in changing its US copier busi-ness had been "greater than we initially expected". The shares dropped 16% to

issued a profits warning in June, said the first-quarter results were "disappointing". Analysts had been looking static at 565p. for about kind parties.

BAA resisted the market from £20m in the same period the time before. The figure came out at £8.1m.

Broker Panmure Gordon was said to be behind the advance in Centrica. The shares improved 2% to 90%p. don reiterated a "strong buy" recommendation and set a 12-18 month share price target of 170p.

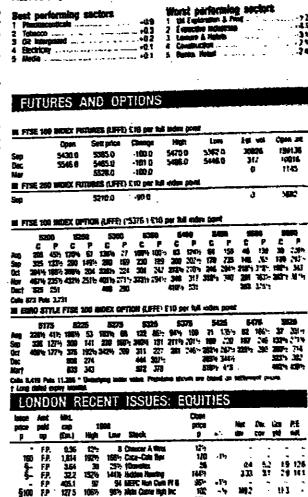

Gearbox maker Antonov benefited from the recent "buy" note from Credit Lyonnais that set a 300p that are expected to show a price target on the shares, pre-tax advance of about 15 which rose 18% to 113%p.

MMS Petroleum, the Aimtraded oil explorer, was marked up a penny after a bullish trading statement but closed unchanged at

A profits warning from Portmeirion Potteries sent its shares down 121/4 to 1900 and took its toll on its peers. The company, which warned industry had

**EMERGING MARKET FOCUS** 

## clear of turmoil

trong fundamentals have bed Mauritius escape the turniol in other emerging markets, sending the stock market to a peak this month. A sharp downton three years ago lasted until the and of 1996 before bargain hunting brought a recovery last year. The local Semdex all-share index bas risen 25 per cent in US dollar terms this year, having hit a record

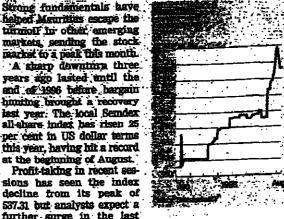

Profit-taking in recent sessions has seen the index decline from its peak of 537.31 but analysts expect a further surge in the last quarter.

Several factors explain the advance. Chief among them is the strength of the local economy. Gross domestic product in the year to June 1999 is expected to continue growing at 5.5 per cent while AssiDoman, the forestry the government has forecast group, fell SKr6 to SKr188, a reduction in the fiscal defiwhile Store lost SKr1.5 to cit from 8.7 per cent to 1.7 per cent, addressing what analysis say is the biggest structural problem.

Pressure on the rupee in the wake of a slide in Asian currencies and later the rand in South Africa, helped make the domestic sugar industry more competitive remains one of the country's main exports. The retreat in the currency has also helped trigger a sharp increase in tourism as holiday makers shied away from Kenya for

fear of political violence. Much of the buying has come from local institutions favourable macroeconomic fundamentals of the island. However, there has also been some overseas investor Africa funds. South African investment interest has also been growing following a relaxation of rules for investors in the Southern African Development Community gion earlier this year.

Banking stocks, such as the State Bank of Mauritius which this week reported fig

expectations, are one of the sectors favoured by invesseen for hotel-related stocks as investors anticipate favourable results from an improvement in tourism.

However, there are some Next month's introduction of value added tax to replace sales tax, and fears of sizeable public sector pay awards are expected to lead to an increase in inflation from 5.4 per cent to around 8

per cent by next June. Naresh Gokarsingh, equity analyst at General Brokerage in Port Louis, believes the bull run is far from over and he expects to see increased overseas buying. He said: "The downside risk is limited in Mauritius because of the macroeconomic picture and with local institutions tending on the whole to go underweight taking a closer look at the in equities, there are good opportunities to buy stock." James Gram-Maw at Foreign & Colonial Emerging Markets is a fan of the Mauinterest from dedicated ritius market but believes the government has to speed up the delayed privatisation

programme. "It would be good to see privatisations as it would draw attention to the country's strong economic record which most investors are unaware of."

Joel Kibazo
